

SPINEXPO™ FORECAST

PHYSICAL

COLOURS

The colour palette of Physical inspires a softer interpretation of active-inspired directions, with references to cricket and tennis uniforms in harmonious contrasting shades of whites; energetic teal, fern green, salmon pink and topaz orange brighten up the graphic colour-blocking aspects of this sporty story.

INSPIRATION

A contemporary sports look based on soft, modern, ergonomic supports. Yarns and fabrics for a changing climate insuring comfort and protection, allowing movement for a sense of wellbeing. Premium fibres and yarns for minimalistic designs with functionality aiming at luxury refinement, the upmarket athleisure and sports luxe market.

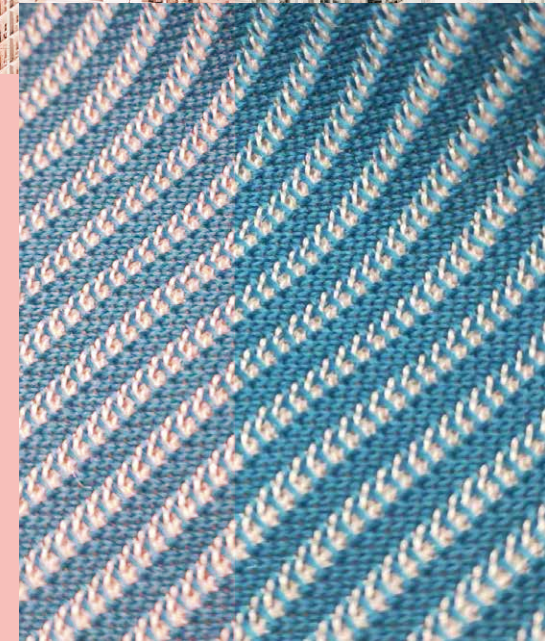

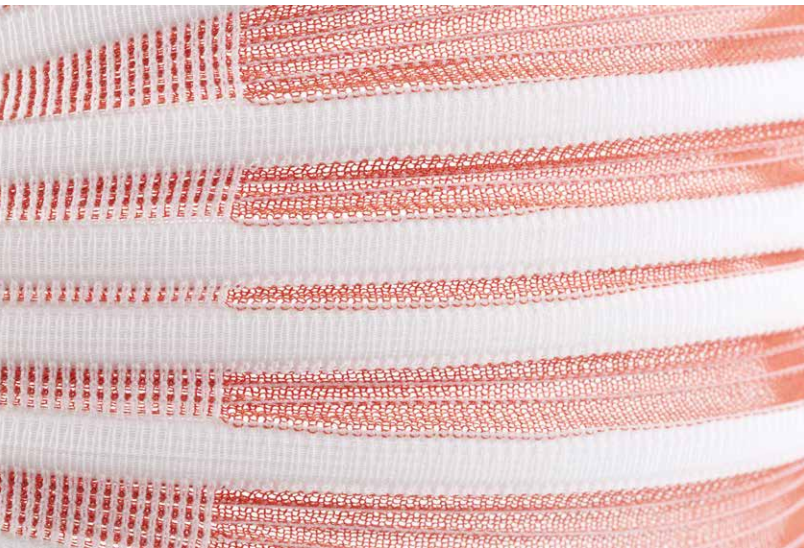

PROTECTIVE PADDING

Shock absorbing yarns and stitches protect us from the elements outside, with spongy aspects and padded details. Geometric padding is inspired from authentic sports equipment, with clever placements and patches allowing designers to play with new proportions and silhouettes.

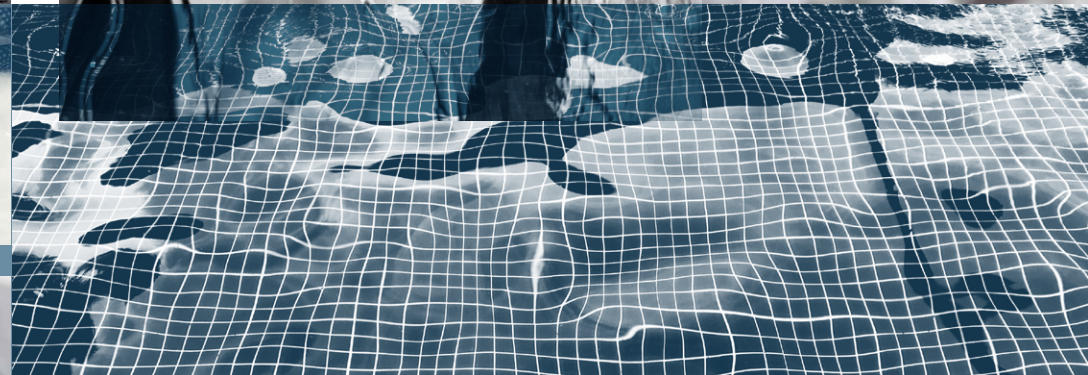

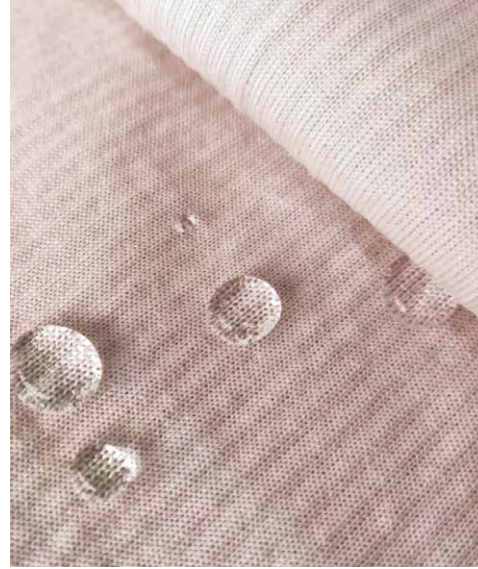

NETBALL

The various incarnations of netting used in sports, from badminton to basketball hoops, introduce a new interpretation of webbed structures. Yarns with waxed and synthetic aspects add to the lightweight and versatile uses of this direction as it is embraced by both mens and womenswear.

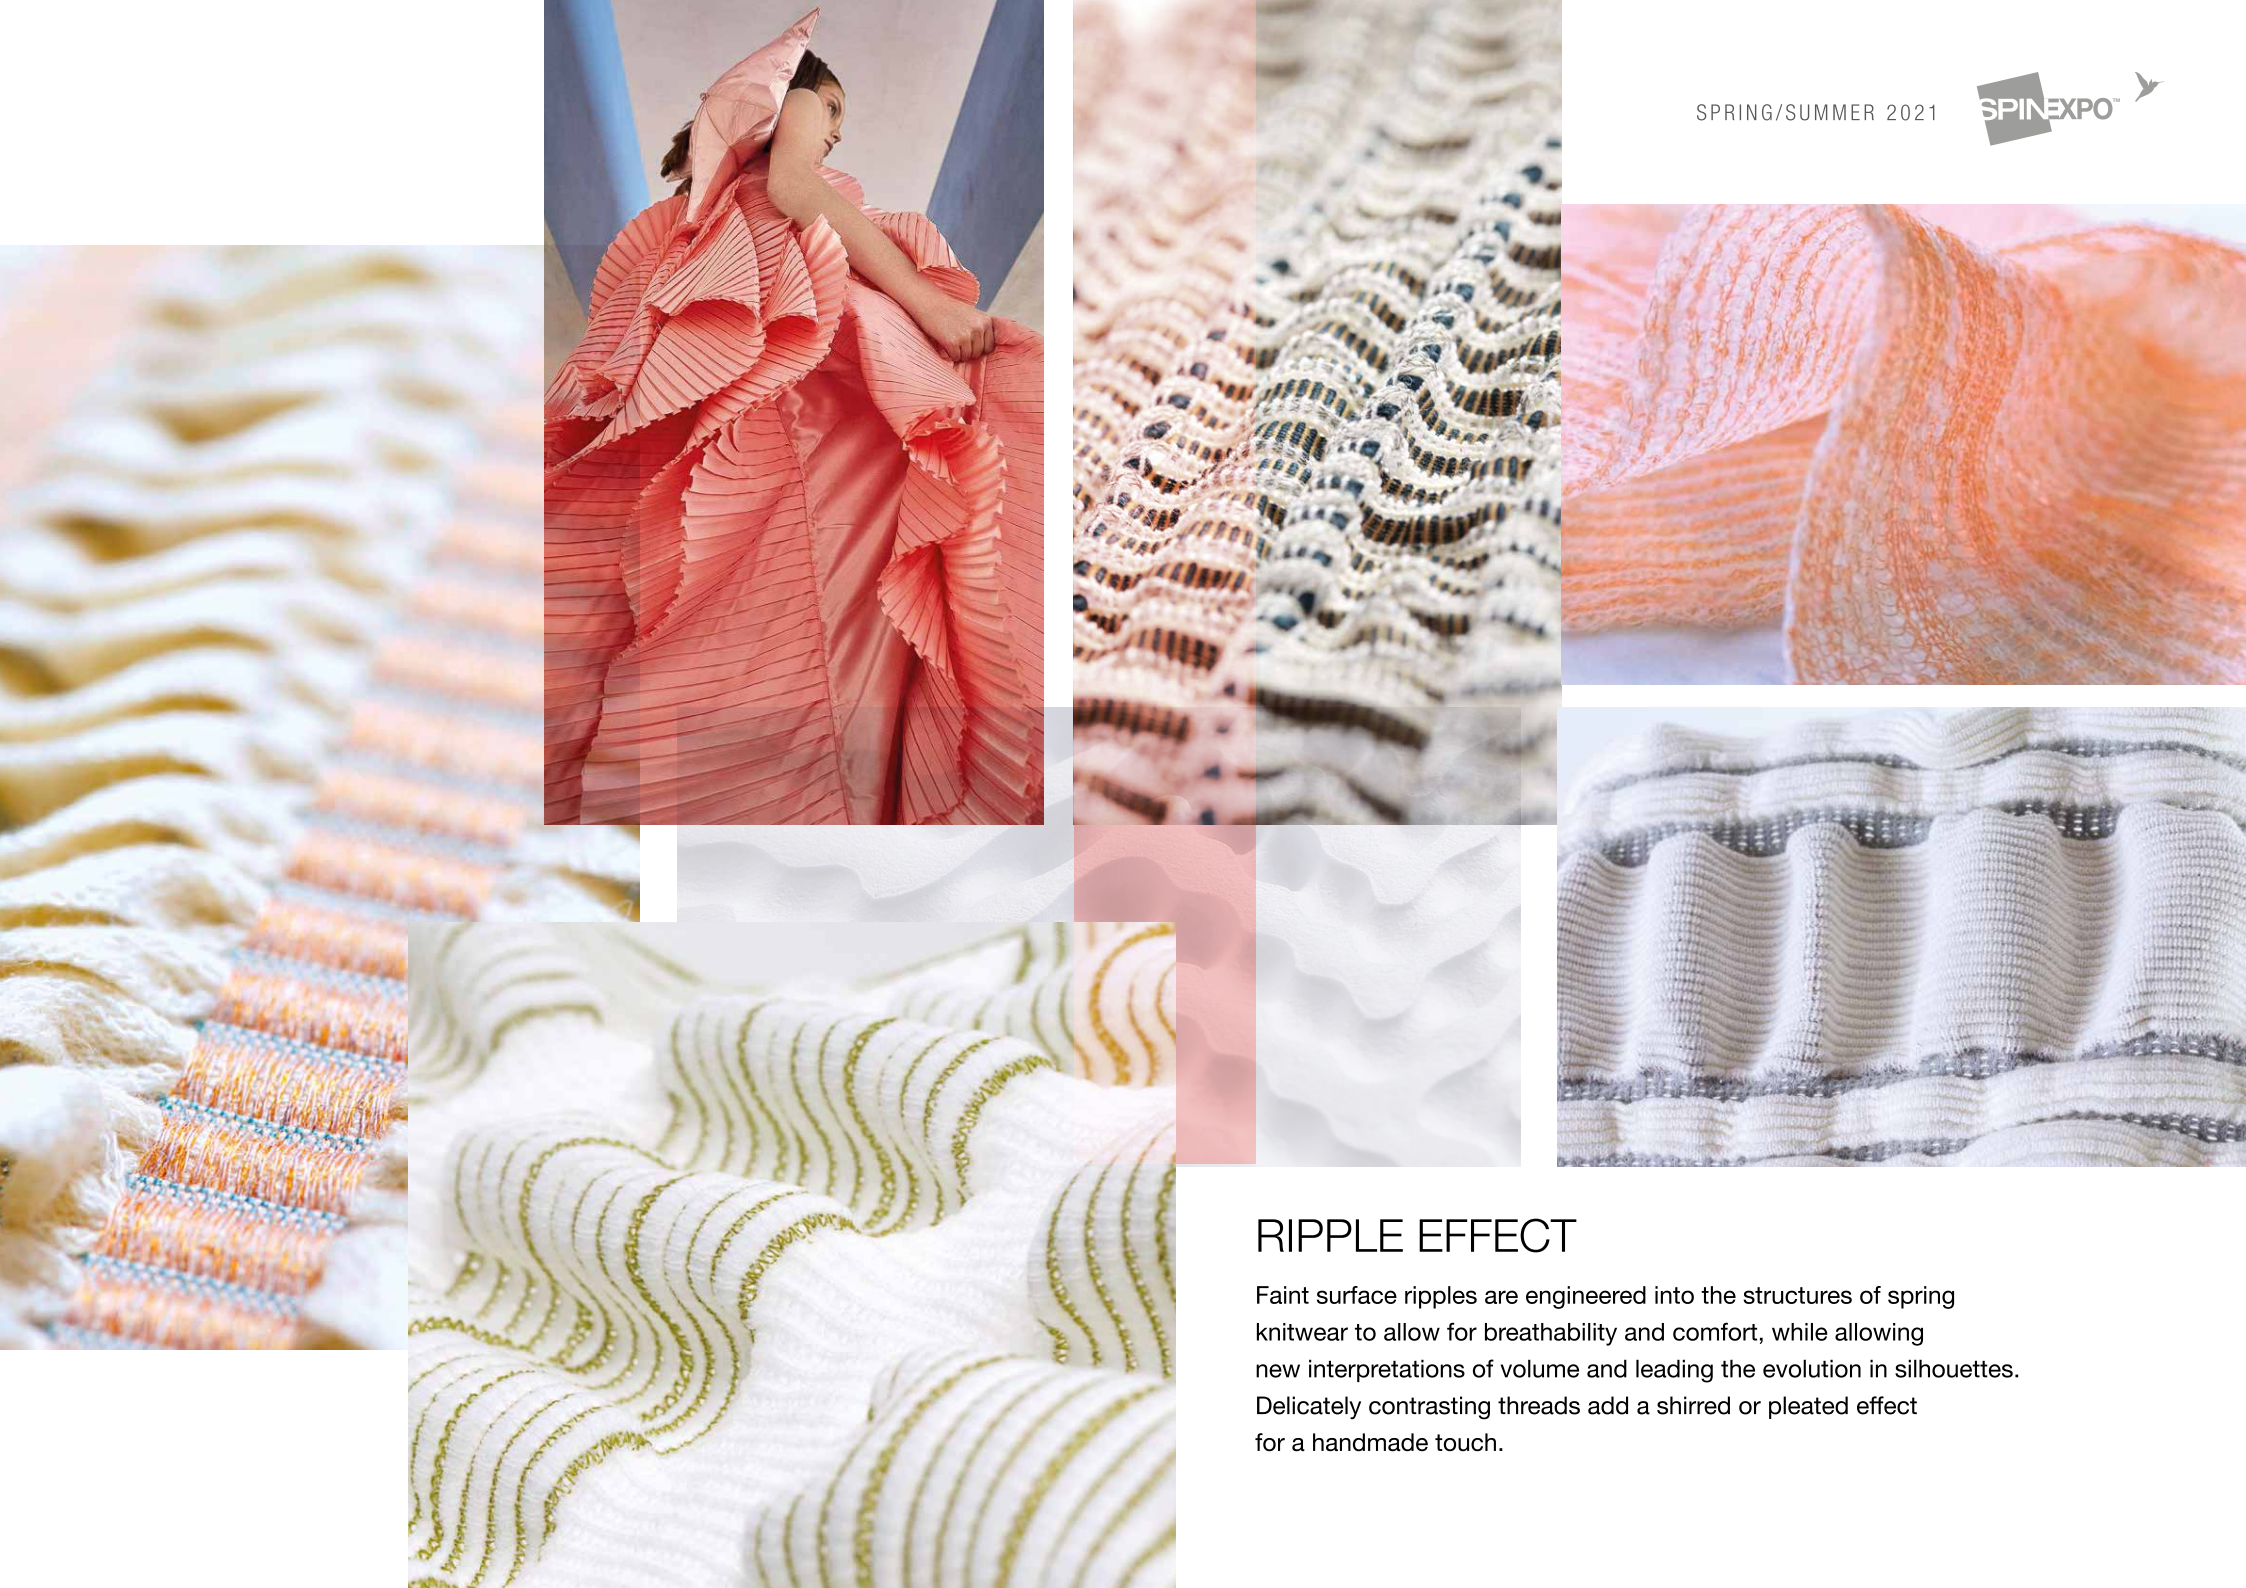

LINEDRIVE

Linear graphics becomes subversive and complex as striped constructions embrace a mesh effect while maintaining a solid base. Architectural innovation becomes a source of key direction for crafting new looks for this upbeat and nautical direction.

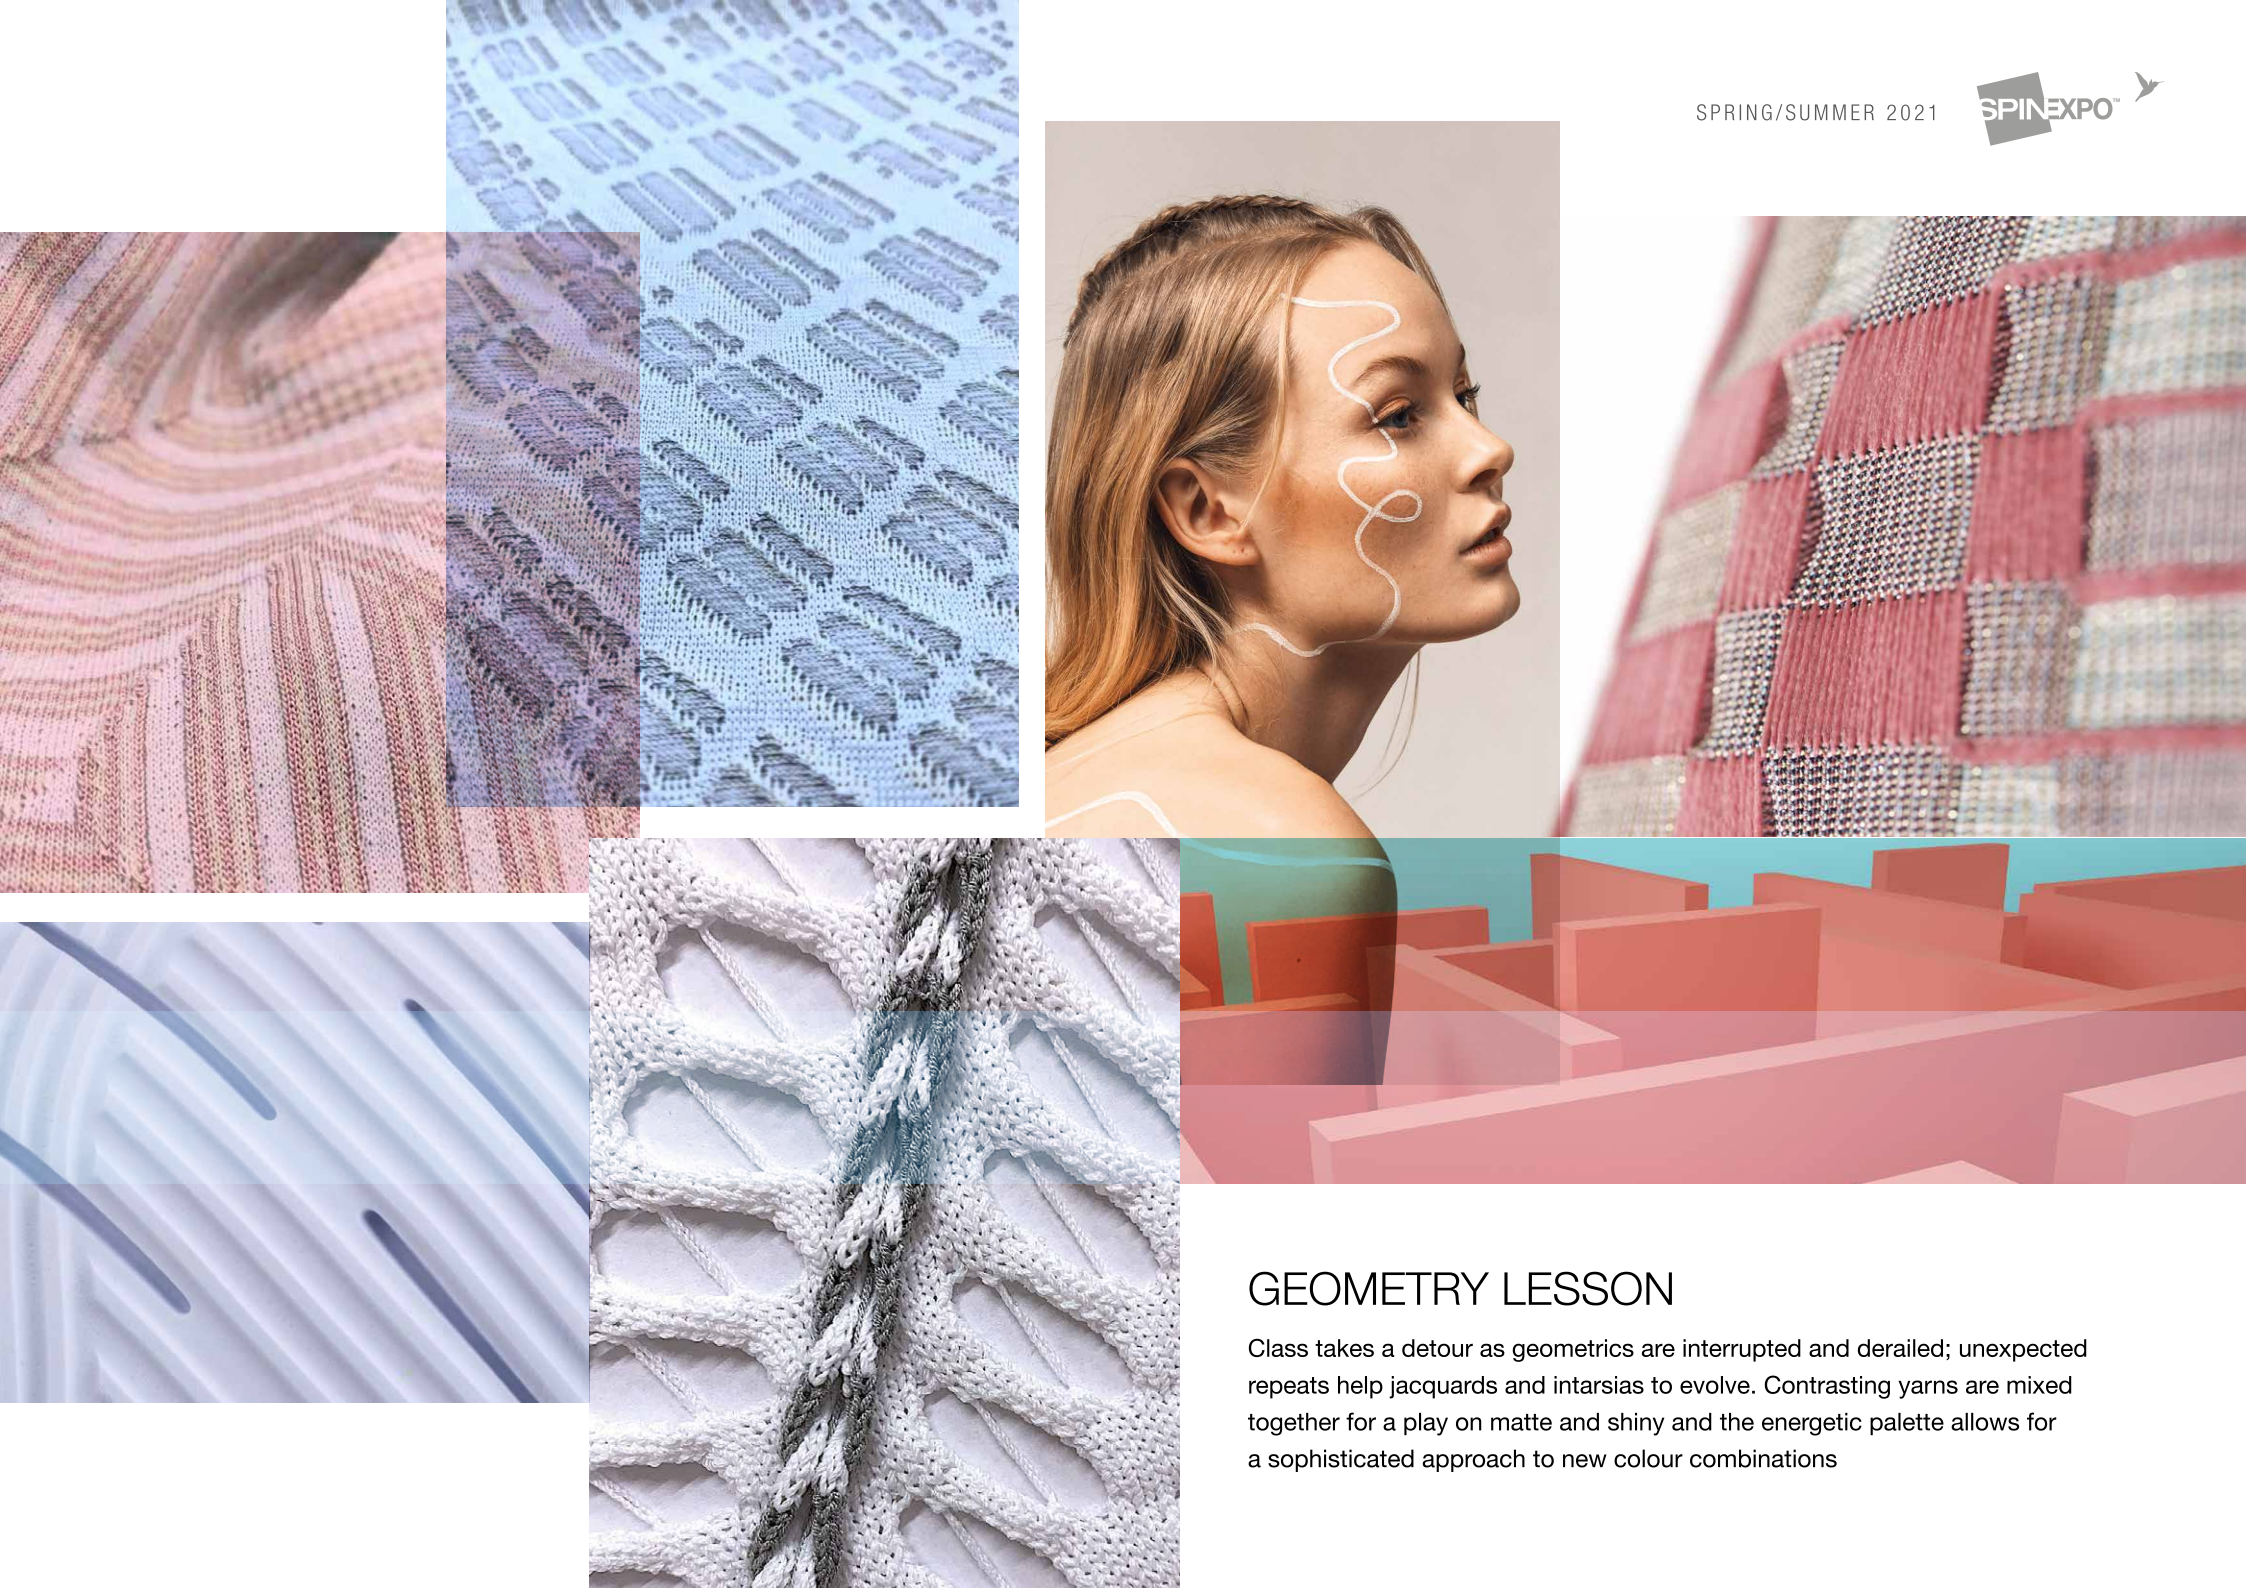

WATERSPORT

Innovative finishes look to impermeable waxes and treatments for a slick and glossy effect, creating high-definition contrast when combined with soft and spongy towelling. Dynamic textures are added via mesh stitches and small tuck stitches that are finely tipped for a graphic pop.

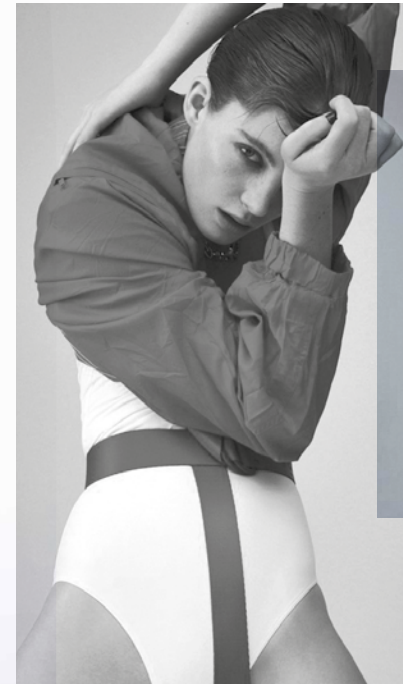

RIPPLE EFFECT

Faint surface ripples are engineered into the structures of spring knitwear to allow for breathability and comfort, while allowing new interpretations of volume and leading the evolution in silhouettes. Delicately contrasting threads add a shirred or pleated effect for a handmade touch.

GEOMETRY LESSON

Class takes a detour as geometrics are interrupted and derailed; unexpected repeats help jacquards and intarsias to evolve. Contrasting yarns are mixed together for a play on matte and shiny and the energetic palette allows for a sophisticated approach to new colour combinations

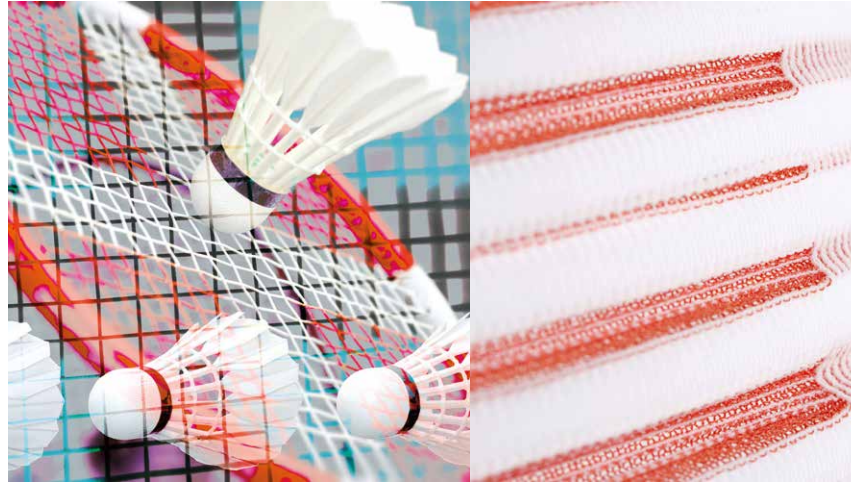

DEFENSIVE BLOCKING

Delicate and lightweight knits dominate for spring, with a sporty colour-blocking approach appealing to all genders. Vintage tennis and football jerseys drive the style-lines on garments while innovative high-tech yarns add a polished look.

STRUCTURED ARENA

Technological advances allow for highly structured and engineered stitches and finishing details, as designers look to modern stadiums and arenas for construction and textural inspiration. Crisp pleats and ribbed patterns add a sharp touch while ergonomic curved structures add flexibility.
