SPINNERS AT THE SHOWS

Autumn/Winter 2021

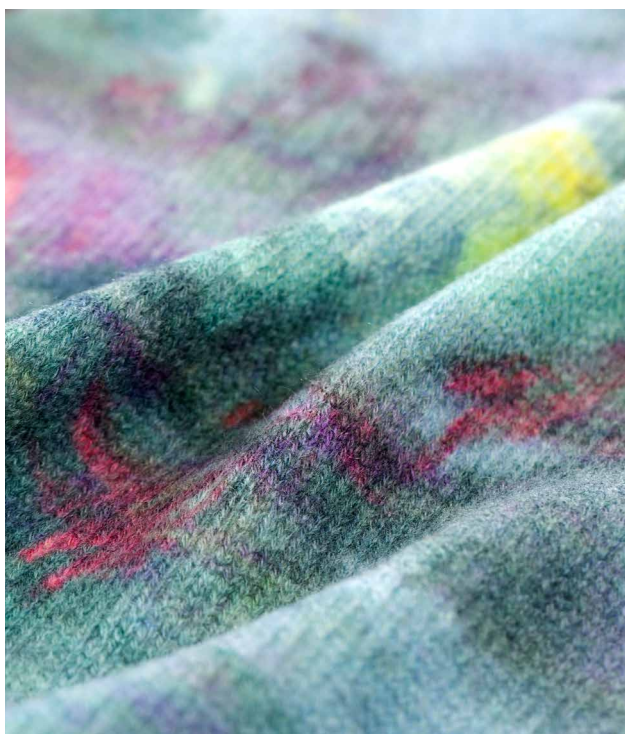

FROM FANCY YARNS TO CASHMERE,
SPINNERS AT THE SHOW HAVE FUNCTIONALITY IN MIND

The Collection themes are Green, Organic and Functional, providing superior quality with comfortable, functional products. Green and organic yarns, responsible wool products in the “Sustainable trendbook”, refreshed with different fashion stitches, allow customers to pick and choose any direction for sustainable products.

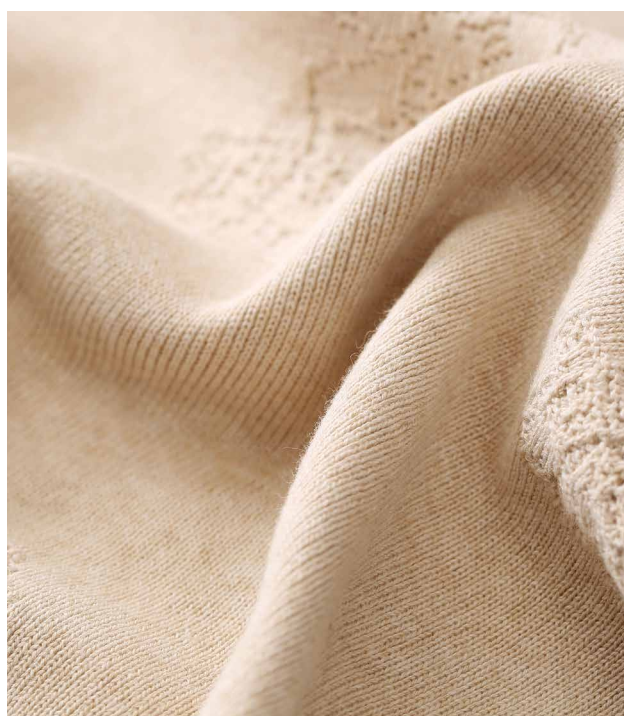

Zhongding develops new woollen spun knitting yarn using natural animal fibre, super-soft, spongy and warm, suitable for chunky gauges like 5gg and 7gg and used for fashion sweaters in both menswear and womenswear, as well as accessories like gloves and hats.

A new development of merino wool in yarn count 35Nm/2 has a soft handfeel similar to cashmere, and its light weight allows to achieve competitive price.

ZHONGDING

For this Autumn-Winter 2021, Zhongding yarns collection bring classic elements from Chinese oriental culture into its line-up, continuing the innate features of grace and elegance merging with the more profound spirit from the Chinese culture. Zhongding high-end cashmere yarn, soft and strong, are interpreted through exploration of smooth and sharp edge brush traces from traditional ink paints. By introducing beautiful patterns from blue porcelain, a renewed point of view is brought to the collection: classic filled with new energy.

To improve the functionality of its yarns for knitting sweaters, Zhongding is developing its ‘Tech Textiles’ series. The products in this series have antibacterial and radio-resistance properties, moisture absorption and are quick-drying and anti-radiation functions.

Environmentally friendly cashmere yarns are launched with the aim of protecting the planet. The colours are mixed, based on the original goat hair colours, to achieve the effect of non-dyeing and environmental protection. It also brings a lot of fun and is a fashionable way to use the yarn. Different colours and different ends can be combined and plied to achieve a final unique yarn. When the yarn is applied with all kinds of knitting tech, the colour saturation and changes become even more unpredictable.

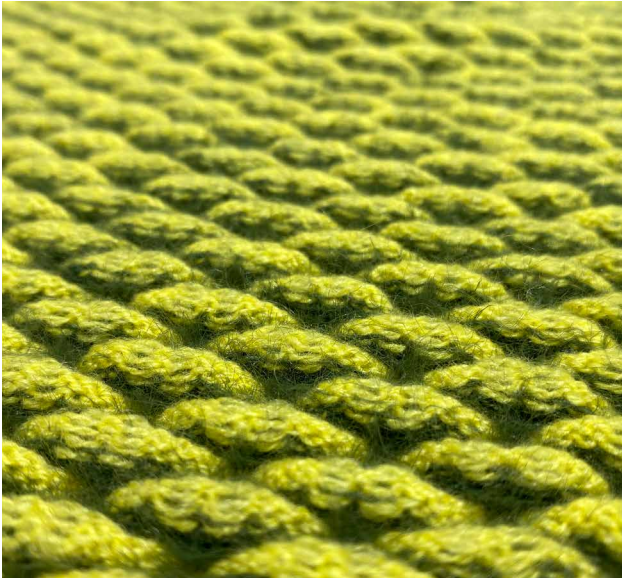

The development of renewable materials such as RWS, recycled acrylic, recycled polyester, Terry and BCI cotton has strengthened the concept of sustainable environmental protection. Recycled acrylic gives products warmth, fluffiness and soft features, good elasticity and dyeing performance. The combination of recycled wool with nylon and alpaca also make the product light, fluffy and warm; colourful neps add interest to the swatch.

With COVID-19 in the background, the Homespun series has been created with a strong sense of comfort. This series focuses more on the wearing comfort of the consumers, mainly using soft and fluffy brushed and peach yarns similar to the feel of cashmere. The warm, comfortable and light texture can effectively help people reduce their anxiety and enhance their sense of happiness in the way they dress.

HUAJIANA

Over the past 30 years, Huajiana has always been in pursuit of excellent quality. To satisfy customers' lifestyle requirements, HUAJIANA has launched a series of cashmere yarns for menswear, womenswear, childrenswear and household accessories. Each cashmere fibre used is personally selected by local, experienced herdsman. Each yarn is produced from selected high-quality raw material.

In striving for the spirit of ingenuity, Huajiana is committed to become the largest supplier in the cashmere field offering a real stock service. A stock cashmere supplier from an early stage, Huajiana has kept developing all kinds of interesting and innovative cashmere yarns to meet customer needs and fit the industry dynamics.

GUOTAI HUASHENG

Guotai Huasheng 21FW's new yarn varieties aim to respond to the orientation towards health and environmental protection, paying special attention to the comfort, safety and practicability of their products, striving to create yarn varieties that make consumers feel safe, satisfied and happy. The colour palette for this season is mainly warm beige camel, yellow coffee, fresh lavender, neutral military green and technological blue-green.

The new highlights of the season products include antibacterial yarns, for which injected viscose additives into the viscose fibre brings a lasting antibacterial function, with adhesive creating a richer sense of environmental protection technology, enhancing safety in wearability.
