37TH SESSION

SPINEXPO™ SHANGHAI

31 AUGUST / 1-2 SEPT. 2021

SHANGHAI WORLD EXPO CONVENTION & EXHIBITION CENTRE

1099 GUOZHAN ROAD - PUDONG - SHANGHAI

SPINEXPO™ organises B2B or trade fair type venues in several continents and countries, providing an interface between fibre manufacturers, spinners and knitwear manufacturers and the domestic and international brands at the forefront of today's fashion.

After the COVID-19 pandemic hit, making normal travel impossible, SPINEXPO™ put together multiple simple presentations that enabled its exhibitors to showcase their collections through their overseas offices and their agents.

SPINEXPO™ Shanghai introduces to the trading offices of overseas companies and to the Chinese domestic market a range of exhibitors whose products are becoming more sophisticated thanks to the innovations of fibre manufacturers and promoters.

SPINEXPO™ Shanghai is a specialist trade fair in its sector.

The trade fair showcases fashion trends and creations by Chinese and overseas designers, bringing a truly international vision at a time when every country is focused on itself.

For the 37th edition, SPINEXPO™ Shanghai is putting together a programme of seminars where several fibre and textile machine promoters will showcase their research trends, aimed at reducing the excessive consumption of natural resources and tackling the challenges of the products of tomorrow.

IN THIS NEWSLETTER WE PRESENT THE INITIATIVES & DEVELOPMENTS OF SOME SPINNING MILLS.

AA GLOBAL

is a Taiwanese spinning mill founded in 1989, which has specialised in fantasy yarns for over 30 years, inspiring this sector with its innovative spirit. AA Global has been actively involved in techniques that enable more environmentally friendly production, going far beyond recycling techniques or awarding accreditations. The spinning mill is showcasing two research themes for the coming AW 22-23 season.

“Say NO to water dyeing”

In order to eliminate water-consuming dye, AA Global has brought out a brand new collection based on DRYDYE technology. For the coming AW 22-23 season, the spinning mill has upgraded this technology by applying it to wool, and showcases a series of new soft and skin-friendly yarns.

“A-Lab Customised Knitwear Design Solution”

Taking into account the demand for stock service, fast fashion, and label accreditations, AA Global is presenting its own Lab, aiming to offer customers something different in knitwear.

Using their own yarn production system that comprises anything from fibre blending to fancy yarn spinning, A-Lab offers closed-loop sweater patterns and designs, guaranteeing the confidentiality and uniqueness of the end-product and avoiding copyright issues.

SÜDWOLLE GROUP

is a global producer of pure wool worsted yarns and wool blends for weaving, circular and flat knitting and technical applications.

Located in the Nuremberg Metropolitan Region of Germany, the company's collections Südvolle, Biella Yarn, Yarn in Motion, Richter, Stöhr and Soey focus on different segments of the global textile market.

Südwolle is more than just a spinning mill. It acts as a partner, offering a complete range of stock supported products for prompt delivery worldwide. Products can be ordered from any of the 11 warehouses based in seven countries, with parallel manufacturing in Europe and Asia ensuring high quality and services.

The 22-23 AW season focuses on the post-pandemic era, a time when people are feeling a greater connection to and thinking more about lifestyles, behaviours and nature. The new collection is called “Human Contact”, and introduces the following qualities:

OTW® Opal Nm 2/60 – 100% superfine merino wool, Super 120's, 17.5mic, anti-shrinkage

The patented Omega Twist yarn offers a smoother surface, higher pilling grade and stronger composition, without compromising its natural softness.

Quarzo Nm 2/60 - 35% superfine merino wool, Super 140's, 16.5 mic, anti-shrinkage, 35% cashmere, 30% silk. The fibre blend gives the fabric an incredibly soft, delicate, and fluffy quality, whilst maintaining its shape and form.

Rubino Nm 2/60 - 50% superfine merino wool, Super 120's, 17.5 mic, anti-shrinkage, 50% cashmere. The blend brings extra softness and smoothness, and is gentle on the skin.

Ascot Nm 2/48-2/60 - 100% superfine merino wool, 15.5 mic, anti-shrinkage. A yarn precisely spun with gold merino wool, which is only 15.5 microns, a fibre as fine as cashmere and as light as alpaca.

Shine 37500 - 94% superfine merino wool, Super 140's, 16.5 mic, anti-shrinkage, 6% metallic PET. SHINE is a blend of superfine merino wool and extremely soft and pleasant Luxex yarn. The addition of Luxex glitter yarn makes for an attractive and elegant finish.
