HONG KONG 12-13 JANUARY 2022

THE SPACE

2F, D2, PLACE ONE - 9 CHEUNG YEE STREET - LAI CHI KOK - KOWLOON

OPENING HOURS - 10.00 AM / 6.00 PM

LONDON 8-9 FEBRUARY 2022

THE OLD TRUMAN BREWERY

91 BRICK LANE, LONDON E1 6QR

OPENING HOURS - 9.00 AM / 6.00 PM

SPINEXPO B2B Hong Kong and London offer seasonal presentations of the Spring/Summer 2023 yarn and knitwear collections.

These presentations aim to bring together a selection of spinning mills, fiber promoters, and knitwear manufacturers to offer buyers the opportunity to discover the latest novelties and prepare their own collections in an intimate setting, conducive to exchanges.

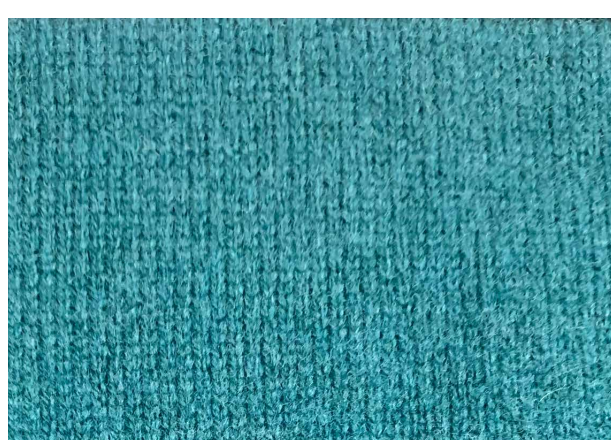

Hong Kong is aimed at local brands and tradings offices, while London is aimed at European buyers who wish to travel from other European countries.

Our exhibitors' new products: intelligent recycling

Our aim is to help local fishermen and middle-aged or older women earn extra income, encourage the fishing sector to join the circular economy, solve the problem of the industrial closed loop and reduce carbon dioxide emissions while promoting the feasibility of recycling ocean plastics. We believe in raising awareness of marine ecological pollution, saving marine animals such as turtles, sharks and dolphins, and enhancing biodiversity until healthy marine ecosystems are restored.

We offer a variety of recycled staple nylon fibres, including biodegradable, carbon-free and undyed fibres.

Product developed with SPINEXPO exhibitors:

InResST by REGAL:

2/16Nm, 7GG, 70% WOOL 30% InResST NYLON

InResST by XINAO:

2/30NM, 12GG, 60% EXTRAFINE MERINO WOOL

40% InResST NYLON

InResST by CONSINEE:

1/7.8NM, 7GG, 24% RWS WOOL 48% VISCOSE

22% InResST NYLON 4% NYLON 2% POLYESTER

InResST by UPW:

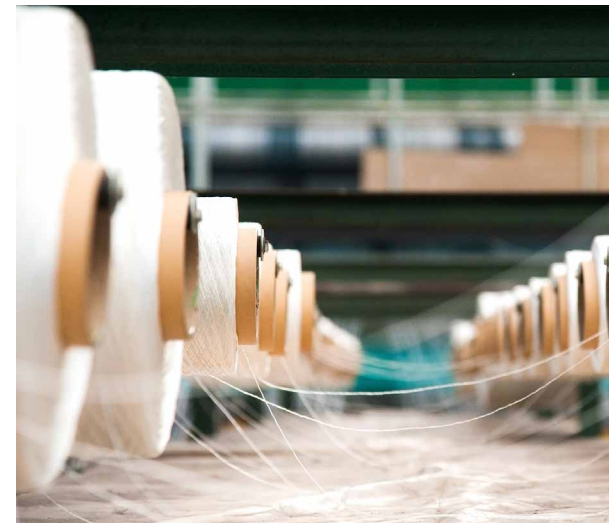

2/14NM, 7GG, 80% RWS WOOL, 20% InResST

NYLON

SPINEXPO™ is proud to present a collaboration between environmentally friendly exhibitors who are working together to find new outlets for the recycling of polluting materials.

InResST is an environmentally friendly, low-carbon company that focuses on the feasibility, research, development, production and promotion of ocean plastics used in textiles.

InResST's recycled nylon staple fibre products are mainly derived from ghost fishing nets, generated by deep sea fishing activities, which are then recycled in a low carbon factory. The performance of these fibres is very similar to that of virgin nylon and can be directly applied to all types of yarns and fabrics and can also be recycled physically and chemically. Our desire is to cooperate with environmentally conscious brands and manufacturers to develop, innovate and work together to protect the environment and the oceans.

Process :

1/ Ghost Fishing Nets

The recycling of ghost fishing nets is the starting point for all InResST products.

When fishing nets are at the end of their life cycle, we encourage fishermen to bring in their used nylon nets and we buy them to give them a new life cycle.

2/ Making Chips by physical method

When the ghost fishing nets are brought to the factory, they are transformed into sparkling chips (PA6) using a modern and efficient assembly line.

3/ Yarn Spinning - Blend nylon fiber, and yarn production

We develop new yarns by mixing them with other yarns with different composition ratios, the nylon fibre used being blended with cotton, viscose, polyester, acrylic, wool, etc.

4/ Garment -- The yarn is woven or knitted into garments, such as T-shirts, sweaters, hoodies, etc.

PRE-REGISTRATION IS OPEN
PLEASE CHECK THE LIST OF PARTICIPATING COMPANIES.
