#### Discover Trends Spring Summer 2023

Under the title "The Fork in the Road globalization and separatism", SPINEXPO presents the color schemes and trend directions that will be presented in each of these events.

*Our first story is entitled "Grounded" and speaks of the perception of the passage of time and its duration during periods of confinement, the diffuse feeling of fear that sets in and the return to a simpler life, dictated both by a deterioration in our confidence in the future and an awareness of a return to the rural environment, a need for landmarks, a search for traditions, but under the aegis of technologies that modernize everything in their path.*

*In textiles, this is the domain of extra-fine merino, lyocell cotton, noble fibers, modernized by functionalities: anti-odor, temperature controlled, quick dry, UV resistant, moisture management, anti microbial and viral blocking.*
