SPINEXPO™ PARIS

7-8 JULY 2022

ATRIUM ST GERMAIN

76 RUE DES SAINTS-PÈRES - 75007 PARIS

Opening hours: 9.00 am to 6.00 pm

FIBRES | YARNS | KNITS | CIRCULAR KNITS | ACTIVEWEAR | SOCKS | HAND-KNITTING WOOLS

SPINEXPO™ organizes in Paris a presentation of spinning and knitwear AW 23-24 collections through a simple presentation of the exhibitors' agents or export managers. This "Business to Business" presentation gather 36 exhibiting companies during two days

An identical presentation will be held in Hong kong

HONG KONG B2B Presentation

20-21 JULY 2022

THE SPACE

2/F, D2 PLACE ONE - 9 CHEUNG YEE STREET - LAI CHI KOK, KOWLOON

Opening hours: 10.00 am to 6.00 pm

Pre-registration and list of exhibiting companies:
www.spinexpo.com

Free entry to any company in the textile sector upon presentation of a business card.

UPW'S NEW ECO PLUS COLLECTION TAKES US ON A JOURNEY INTO THE WORLD OF SUSTAINABLE RAW MATERIALS AND INTELLIGENT FIBRES DEVELOPED BY THE SHOW'S FIBRE MANUFACTURERS

SPINEXPO™ wishes to support UPW's philosophy in promoting the concept of sustainability, brought about by the use of organic or regenerated fibres, recycled yarns, closed loop production and the integration of biodegradability.

For a complete overview of the collection :
<https://we.tl/t-kJzqXTsDKn>

Products offered include a range of products from organic hemp and cotton fibres, fibres that play an important role in soil enrichment and water protection ; UPW also offers all products from recycled fibres, such as RENU™ recycled polyester, which reuses unsold stock by breaking it down and then reconstituting it to recreate products of comparable quality.

Among the new fibres developed with the aim of both preserving the environment and keeping the collections creative and innovative, UPW uses Eastman's Naia™ acetate cellulosic staple fibre, which is highly resistant to frequent washing and features fast drying

and no pilling. Like Lenzing's Tencel™, it comes from forests maintained according to sustainable development criteria; both fibres are biodegradable.

As for Seacell™ and Smartcel™ fibres, they are at the heart of development of new technological products: Seacell™ comes exclusively from wood and untreated algae, contains vitamins, minerals and amino acids that relieve skin diseases by reducing inflammation and itching. Smartcel™ is a cellulosic fibre that contains zinc, an essential element for our well-being as it is vital for our immune system as well as for the regeneration and protection of our metabolism.

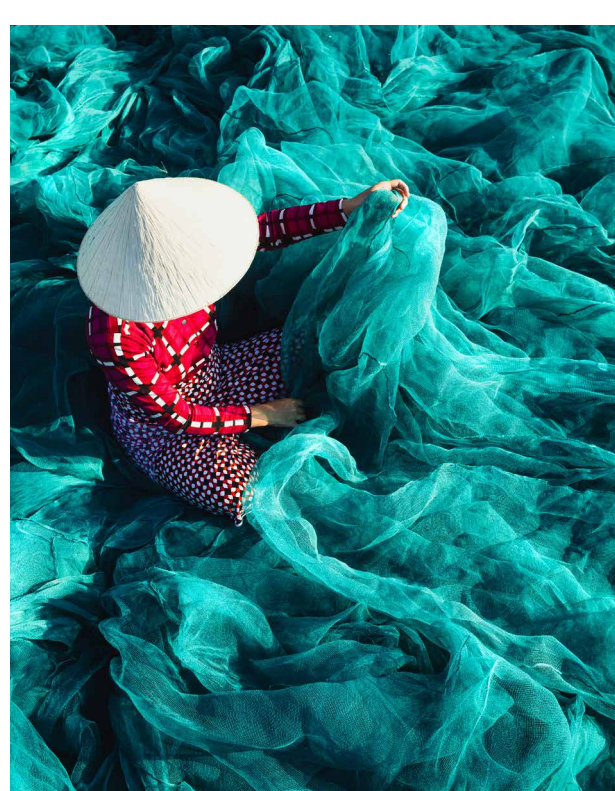

UPW's collections also include Cupro, which is a natural regenerated biodegradable fibre derived from the down of very short fibres adhering to cotton seeds after ginning. Ciclo® polyester and Ciclo® nylon come from a technology that allows polyester and other synthetic materials to decompose like other natural materials; these fibres have received the Oeko-Tex Eco certificate.

The latest fibre used by UPW, as by many exhibitors at SPINEXPO™, comes from an exhibiting company that the show has been following since the beginning of its activity: Ciclo® x InResST.

InResSt, exhibiting in Paris, Hong Kong and Shanghai, had the idea of reducing microplastic pollution in the oceans by exploiting the waste from fishing nets or clothing while helping fishermen by buying back their used nets. All these products made from plastic waste and used fishing nets are processed in zero-carbon factories and reduce CO₂ by 95%, energy consumption by 96% and water consumption by 52%.

The exhibitors at SPINEXPO™ form a chain in the quest to reduce textile pollution ; the collaboration between fibre manufacturers and spinners is constantly intensifying with the aim of presenting collections that are increasingly in line with consumer demand for textiles that respect the planet and our health.

Don't forget

SPINEXPO SHANGHAI

30-31 AUGUST / 1ST SEPT. 2022

SHANGHAI WORLD EXPO & CONVENTION CENTRE

PUDONG - SHANGHAI
