HIGHLIGHTING THE BESTSELLERS OF SPRING/SUMMER 2024

NAIA ACETATE

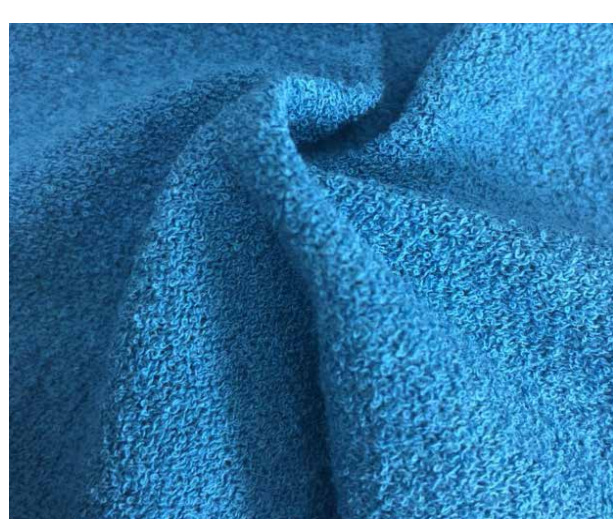

Naia acetate twisted with stretch nylon

1/37 NM, 77% Naia Acetate, 23% Stretch Nylon
The acetate is made from American Naia acetic acid and elastic. The craftsmanship is exquisite and stable, and the raw materials are environmentally friendly and sustainable. Product features: easy to wash and dry, moisture absorption and breathability, no static electricity, antibacterial and environmentally friendly, comfortable and dry hand feeling.

TENCEL ACETATE

Tencel lyocell combined Naia acetate

1/30 NM, 74% Tencel Lyocell, 26% Naia Acetate
Tencel Acetate is made from American Naia Acetate and Loycell Tencel, with exquisite and stable craftsmanship, ecological and sustainable raw materials. Product features: Durable, skin-friendly, moisture-absorbing and breathable Eco soft technology.

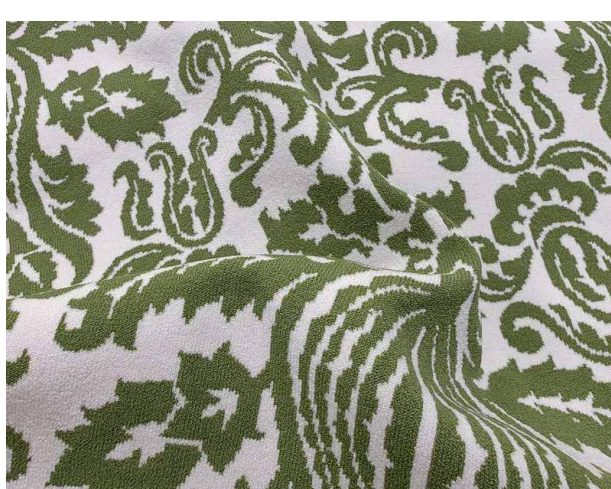

WINNING TEXTILE

Winning Textile was founded in 1988 and specialises in high-end spring and summer yarns, recycled rayon, viscose, Naia acetate, Lenzing Ecovero, Tencel Lyocell, Tencel Luxe filament.

The Winning Textile factory is now located in Changzhou City Industrial Park, Jiangsu Province, and has the entire industrial production chain: yarn twisting, raw material quality control, dyeing, dyed yarn quality control, rewinding, packaging.

Winning Textile highlights of the season:

Their seasonal novelties have obtained reliable, sustainable certifications (FSC, Canopy) and are composed of Acetate~Naia acetate twisted with stretch nylon, Tencel acetate~Tencel lyocell combined with Naia acetate, Elisa~recycled viscose twisted with elite polyester.

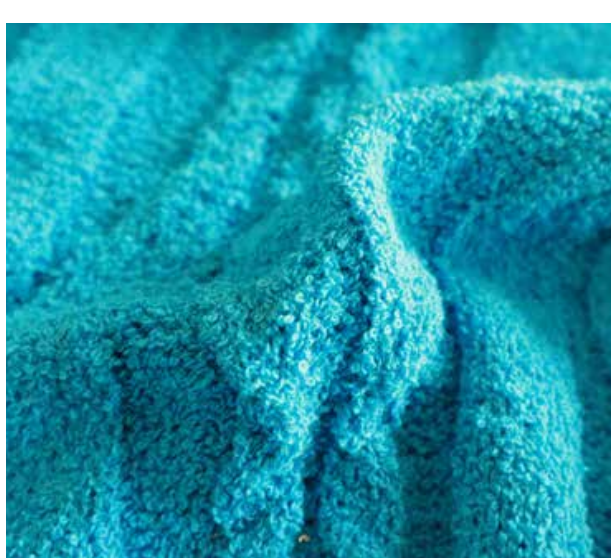

ELISA

Recycled viscose twisted with elite polyester

1/47 NM, 79% recycled viscose,

21% elite polyester

Elisa is made from recycled and environmentally friendly viscose filaments and high elasticity yarns. The elastic fabric is spliced by a special technology, it has a high elasticity and resilience, and a comfortable and dry hand feeling.

BEST SHAN

Best Shan is a fancy yarn spinner from Taiwan, well known for its creative collections.

Best Shan's recommendations for several key items for the coming season:

COSTA-ECO

73% organic cotton/, 27% nylon

Natural organic cotton core fills the ribbon yarn, there are several types of Nm to meet the needs of different brands and designers, a yarn environmentally friendly, comfortable and with a sense of luxury.

BAZIA-ECO

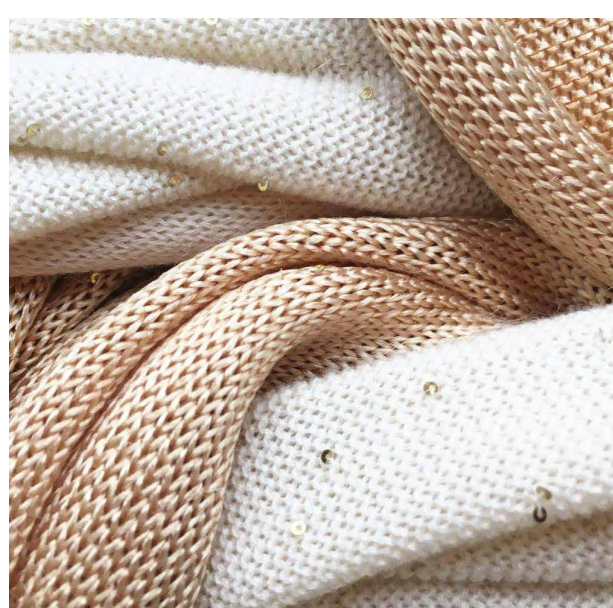

73% organic cotton, 27% nylon

Natural organic cotton looped fancy yarns, with many Nm types. Environmentally friendly. The looped structure also provides a comfortable and light feel.

CHENILLE-ECO

65% Recycled Polyester, 35% Polyester

Ultra-fine regenerative chenille, fine texture, no shedding, velvet-like, with a luxurious, soft feel. Rich in suede surface and good in sagging.

DALIA

38% Paper, 42% Cotton, 20% Nylon

Fancy feather yarns Washi is one of the very good environmental materials of Spring Summer. With the impact on global environmental protection, Washi is very beneficial to the environment, as it takes from nature and gives back to nature.

MONSINO-ECS

97% organic cotton, 3% polyester

Monsino is very bright, thriving, like a star in the sea, with a sense of luxury and softness.

With the 100% organic cotton base, it meets the requirements of global environmental protection.
