ADVOCACY

SIGNATURE FOR REBELLION

THE THIRD PART OF OUR SPRING/SUMMER 2025 TRENDS

A fight against the established order, expressed in provocative parades, multicolored carnivals, multiracial and LGBT clans, where identity and difference are asserted.

A struggle against what is perceived as oppressive, in a debauchery of color and extravagance where the intensity is palpable.

The aim is to make the most of what already exists, in a spirit of craftsmanship: pointillism or hand-painted prints, crochet, knitting or macramé, braiding for playful, festive silhouettes. The idea is to breathe new life into clothes by trying to make them rare with recycled ornaments and accessories.

PROPOSALS FROM OUR EXHIBITORS

UPW's MOZART Eco features an unusual fiber blend. It is one of UPW's most creative yarns for SS 25. Its unique appearance and dry feel make it ideal for large, oversized knits. ROTHKO is a 12-gauge yarn with a very special appearance. The color combinations and details obtained during the spinning process give it all the characteristics of a printed yarn.

In the **SHILEAD** collection, WRW-XLD234A is a space-dyed yarn containing 73% recycled polyester with a unique dyeing technique. Blended with a bouclé yarn, its faded denim effect is ideal for retro styling.

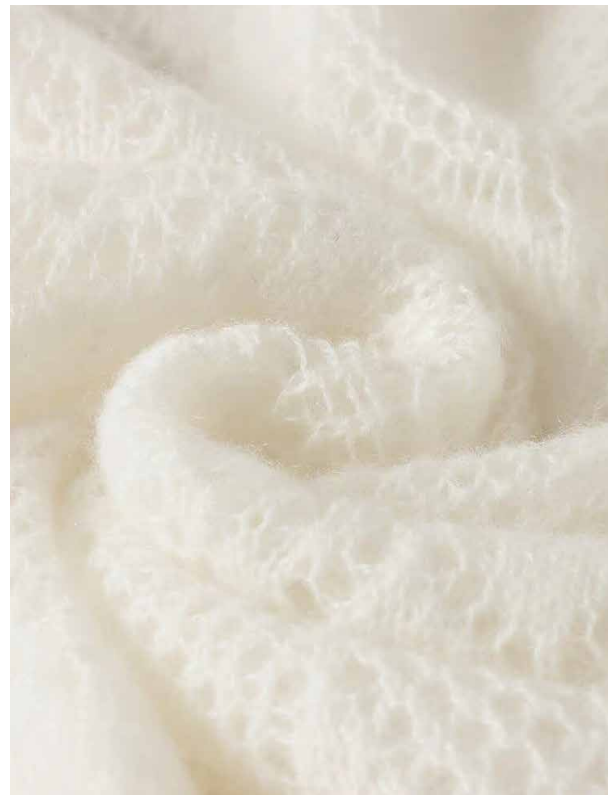

At **YARNS & COLORS**, ARON is a fancy butterfly yarn with a special Chanel-style texture that gives the knitwear surface a unique 3D look and a comfortable, lightweight feel. A wide range of uses and titling options for a playful, dynamic effect.

SHI-KWAN's SHIXU is a 76% cotton looped yarn. Thanks to unique equipment, the loop is fine and tight, elegant and delicate. The knit has a soft, dense feel and is pleasant on the skin. To preserve the 3D look of the loop and give a vertical effect, special equipment and techniques are used to integrate nylon and enable a wide range of applications. SPRING LINK yarn combines the characteristics of linen and organic silk, giving it a clean appearance with good antibacterial properties and a soft texture.

CONSINEE presents AMAYA, an all-season cashmere yarn that uses the unique water-solubility of PVA. The unique structure provided by the air cashmere technique makes the yarn fluffier, lighter and more slippery than conventional cashmere. Its light texture, combined with semi-transparent, layered modeling, is a definite eye-catcher for its delicacy and brilliance.
