SPINCLUB PARIS and SPINCLUB NEW YORK will present a selection from the main exhibitors at SPINEXPO™ SHANGHAI during the first two weeks of July 2024.

These sourcing days enable European and North American buyers to interact with their main suppliers on their own continent.

This event is exclusively reserved for buyers and we only accept exhibitors who are exporting spinning mills and knitwear manufacturers selected for the quality of their products and services.

Entry is free – visitors are required to pre-register or present a company business card on the day.

AUTUMN WINTER 2025-26 COLLECTIONS

The spinners' offerings for Autumn/Winter 2025-26 set the tone for a warm season, with high-quality materials and luxurious finishes contributing to the creation of soft, sensual knits. This trend evokes the passing of time and embodies sustainability and quiet luxury: a more sustainable fashion perspective.

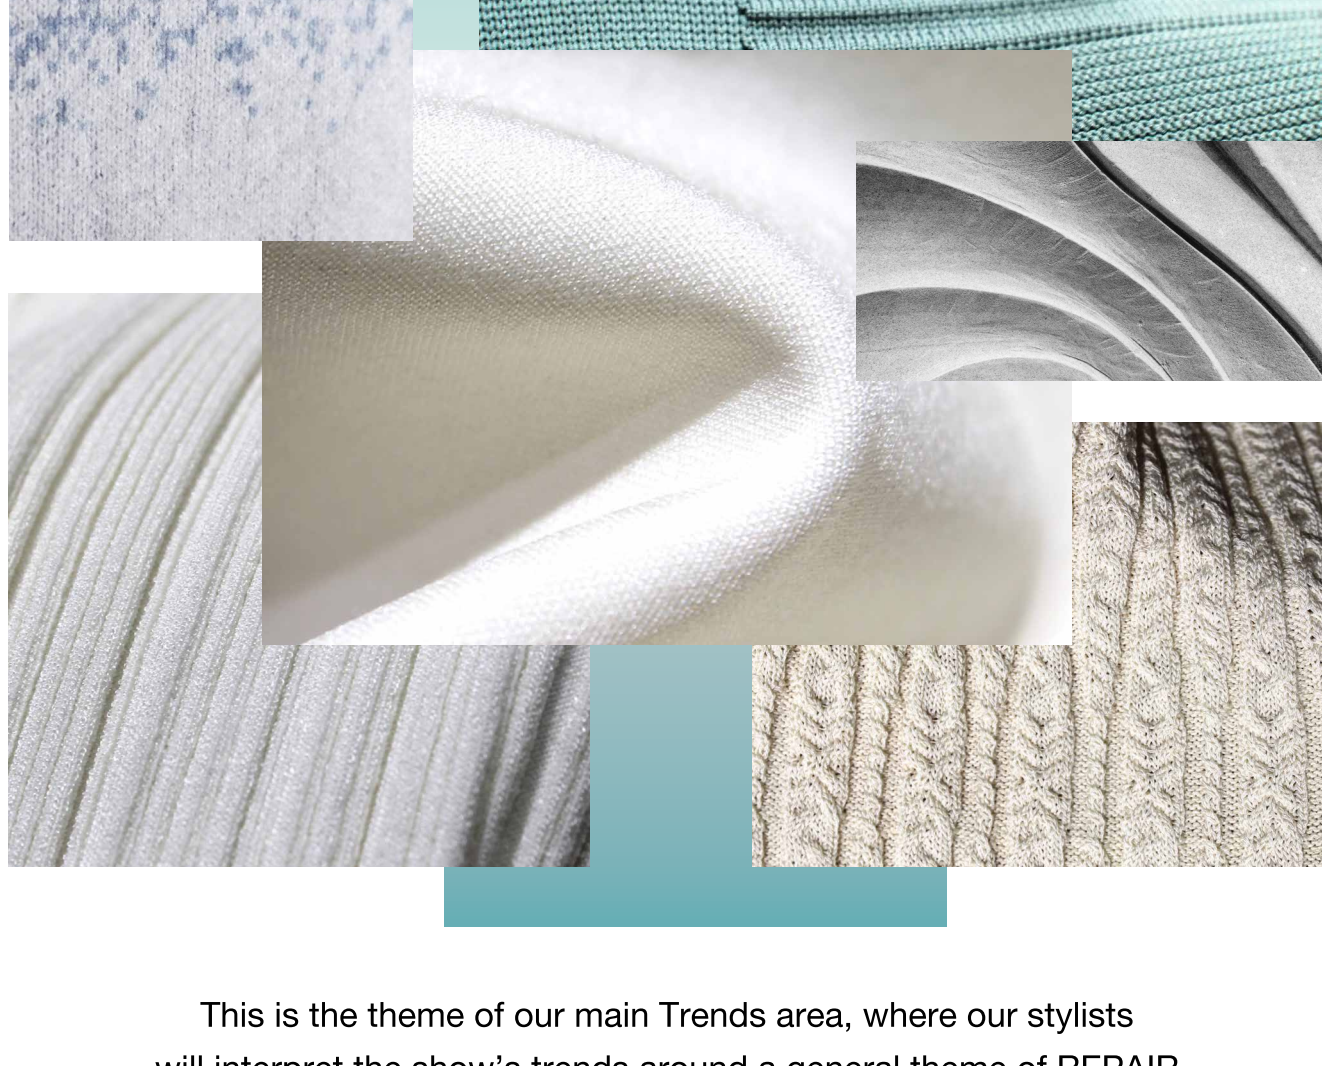

Fine materials take pride in place, with yarns and knits in cashmere, alpaca, yak, and llama. These are often presented in their original, natural colors and are always designed for maximum comfort, performance, and functionality.

For the first time since SPINEXPO was launched, this range of yarns and knits has been expanded to include coordinating fabrics, lodens, herringbones, and wool velvets. These products are manufactured exclusively in our exhibitors' factories.

This season also features an extremely diverse range of colors, with winter pastels that are more active than romantic. These pastels link modern minimalism with sports influences, creating a contrast between classicism, sportiness, freshness, and elegance.

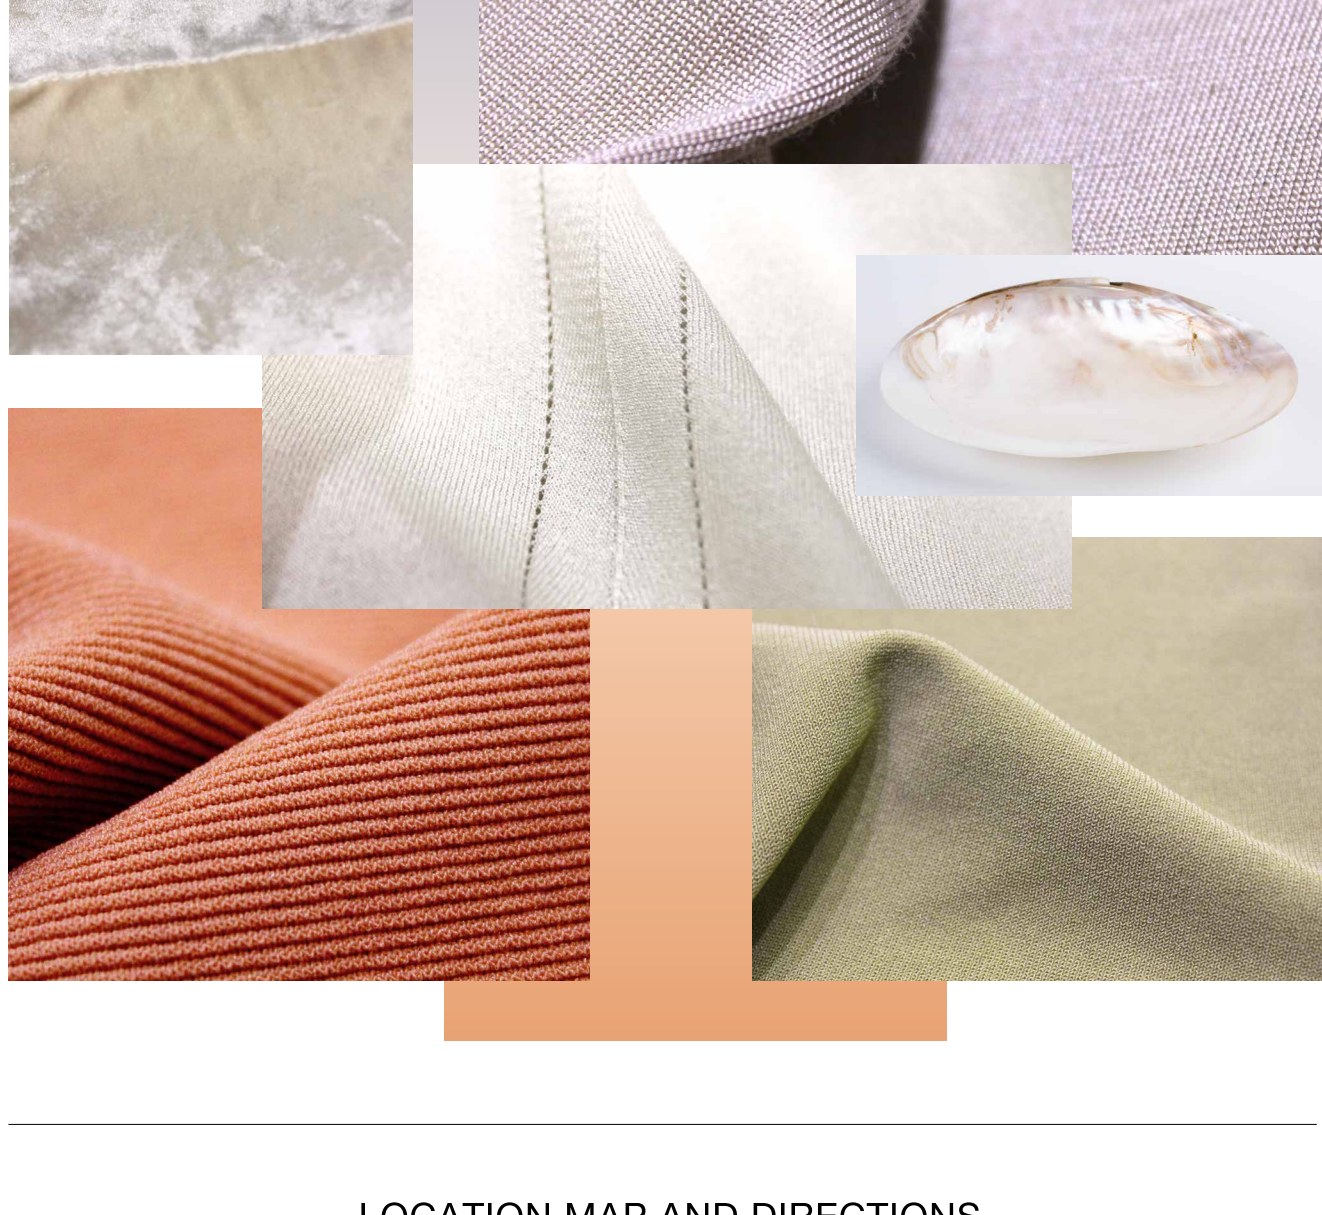

REPAIR

REASSURANCE

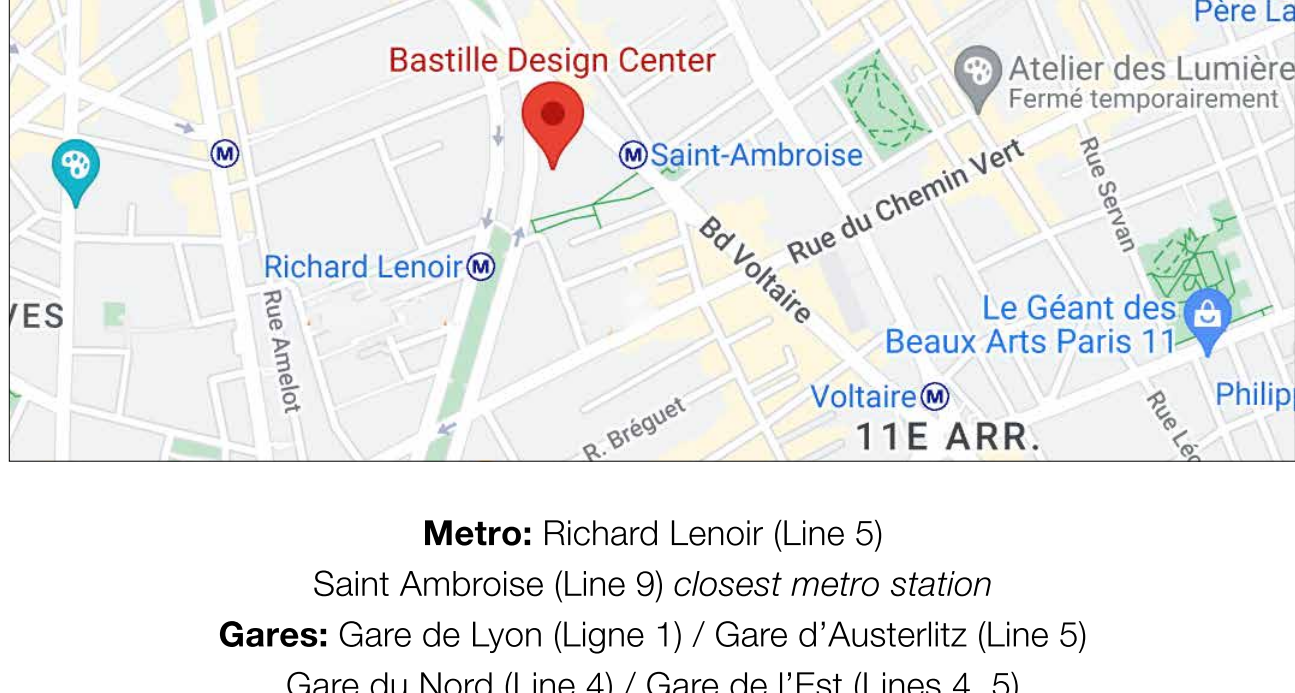

This is the theme of our main Trends area, where our stylists will interpret the show's trends around a general theme of REPAIR and two complementary sections: a day-time-focused section called REASSURANCE and an evening-focused one called CONNECTION. It's the perfect place for SPINEXPO spinners to showcase an extensive range of cashmere products and other high-quality materials, as well as modern blends for fine knits and woven fabrics.
