### BAOHENG

**BAOHENG unlocks a world of possibilities beyond just high-quality yarn!**

Guangzhou Baoheng Textile Technology is a limited textile company that integrates research and development, production, and sales. The company specializes in manufacturing fancy yarns and semi-worsted yarns, which are extensively utilized across the textile and garment industries.

Since its inception, Guangzhou Baoheng Textile Technology has been committed to consistently expanding its production capacity, refining its technological capabilities, and establishing a comprehensive quality management and after-sales service system. The facility is equipped with a complete range of professional production equipment, ensuring the highest quality in every product.

Guangzhou Baoheng Textile Technology provides customers with high-quality yarn and tailored services. Its team of professional yarn designers possesses a deep understanding of various textile raw materials and extensive knowledge of yarn production and spinning processes.

The company has established a sample room and R&D workshop, enabling it to create unique yarn solutions that cater to customers' needs and align with market trends.

Guangzhou Baoheng Textile Technology offers a diverse range of products to meet the varying demands of its clients. The factory has double-twist frames, covering machines, and various types of three-roller and five-roller fancy twisting machines. Product offerings include T/T yarns, Lycra, blush yarns, bunchy yarns, loop yarns, nep yarns, and paragraph color yarns. This variety ensures that clients' needs can be met. The workshop production line is overseen by an experienced team that meticulously manages every process. The company prioritizes stringent quality control at each production stage to ensure excellence and reliability in fulfilling bulk production requirements. Clients can rely on Guangzhou Baoheng Textile Technology for dependable and superior outcomes.

### BAIYI

**With a strong emphasis on technological advancement, BAIYI pursues an unwavering commitment to the quality of its yarn products.**

Guangdong Baiyi Textile Technology stands at the forefront of fashion yarn development, seamlessly integrating production and sales to empower brand designers with innovative raw material insights and advanced technological services.

Guided by core principles of research and development, innovation, integrity, quality, and exceptional service, Guangdong Baiyi Textile Technology boasts a diverse and dynamic development team. This includes designers from Hong Kong, the UK, and domestic talents collaborating to meet varied market demands while blending technology with contemporary trends. The company is committed to continuous innovation, developing new yarns, weaving applications, and sample displays that provide customers with an extensive selection. The company's diverse and environmentally conscious offerings feature premium natural yarns, including brushed yarns crafted from wool, cashmere, yak wool, llama hair, mohair, and recycled fibers.

In its quest for growth, the company actively engages in international exhibitions, with plans to expand its presence in European markets. This strategic move aims to enhance foreign trade and propel the company toward a globalized future.

BAIYI emphasizes technology and design-driven innovation, aiming for the highest quality in its yarn products. Their approach is informed by a global multicultural perspective, allowing them to stay attuned to emerging trends and industry developments. They produce and manage an extensive range of yarns, including luxurious natural options such as wool, cashmere, yak wool, and llama wool. Their fancy blended yarns are designed to reflect international fashion trends, showcasing stylish colors and unique characteristics.

BAIYI prioritizes using sustainable materials and is dedicated to reducing carbon emissions. Their products have earned multiple environmental certifications, including RWS, RMS, OCS, and GRS, ensuring that they meet the diverse needs of their customers while adhering to environmental standards.
