SPINEXPO™ SHANGHAI 19-20-21 AUGUST 2025

WORLD EXPO EXHIBITION & CONVENTION CENTER

1099 GUOZHAN RD, PUDONG - SHANGHAI - CHINA

SPINEXPO™ is a select international exhibition in the spinning and knitwear sectors. All exhibiting companies have obtained international traceability labels, are partners in the recycling industry, and promote energy-saving in manufacturing processes.

Pre-registration & list of exhibitors : www.spinexpo.com

Pre-registration is mandatory – No registration onsite.

Visitors coming without a pre-registration code will not be able to attend on the day of their visit but will have to wait 24 hours to receive the registration code.

At SPINEXPO™ Shanghai, and in the face of numerous international challenges, the spinning mills present are multiplying their collaborations with a view to presenting increasingly attractive and effective products. After presenting CASHMORIA, a new line of fancy cashmere yarns born of the collaboration between M.Oro and Yarns & Colors,

WE PRESENT

TANGOLA AND UPW'S YAK YARN TRACEABILITY PROJECT:

“Unveiling End-to-End Digital Traceability for Yak Fiber, from Pasture to Product.”

TANGOLA, a pioneer with over 30 years of dedication to the Qinghai-Tibet Plateau, has announced the successful launch of a comprehensive digital traceability system that covers the entire yak fiber supply chain — from sourcing on the plateau to finished garments.

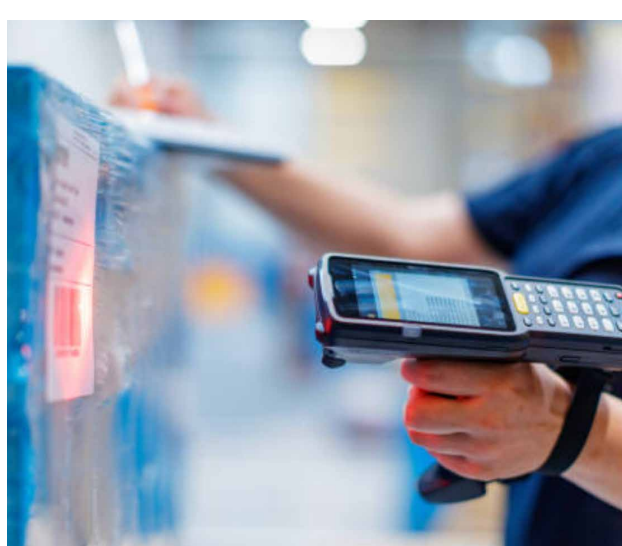

The system assigns a unique digital ID to each batch of yak fiber. Every key stage — from natural molting on highland pastures, to collection, washing, combing, spinning, dyeing, and garment production — is securely recorded and stored on an immutable blockchain platform. With a simple scan of a QR code, consumers can access a product's complete history, ensuring full transparency: source traceable, destination trackable, accountability assured.

Its proprietary BEST service framework enables brands to source yak fiber at origin, integrate traceability technology, and develop custom hangtags — building trust across the entire supply chain.

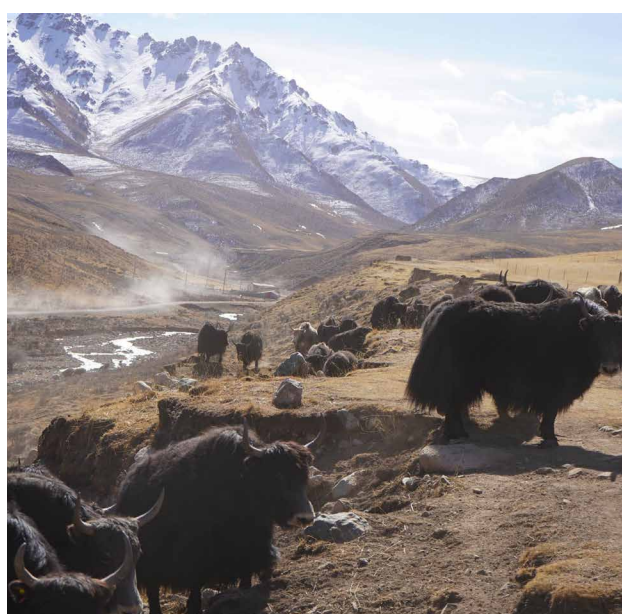

UPW® has also contributed significantly to creative development through its Insight trend research program. The program explores new design possibilities for yak fiber, including innovative color palettes, swatches, and knitwear styles.

TANGOLA and UPW® are enabling rare fibers from the Qinghai-Tibet Plateau to embody true sustainability, trust, and accessibility in the digital age — setting a new standard for fashion and responsibility worldwide.

“For us, this is far more than a technology platform,” said a TANGOLA spokesperson. “It reflects our respect for the plateau’s ecosystem, our dedication to craftsmanship and quality, and our promise of transparency to consumers worldwide.”

As a key partner, UPW® has provided essential support. A leader in responsible highland fibers, UPW® brings deep expertise in digital traceability, sustainable fashion, and creative innovation.
