**Pre-registration & list of exhibitors : [www.spinexpo.com](http://www.spinexpo.com)**

### NEW THIS SEASON

Among the new collections, we chose to present the spinner Hengtai Textile new fancy yarns collections.

## HENGTAI TEXTILE

**Balancing Performance and Tactility**

As yarn development becomes increasingly segmented, functionality, sustainability, and material aesthetics have emerged as central concerns for both brands and consumers. With a fully integrated production chain, Hengtai Textile continues to refine product performance, structural craftsmanship, and tactile experience. Its diversified yarn offering centers on two main paths: function-driven yarns and classic yarn collections, meeting a wide range of application demands.

#### Functional Yarn Collections

This product group focuses on delivering reliable, measurable performance across various applications such as next-to-skin garments, footwear textiles, and active/outdoor apparel. These yarns are engineered to meet technical standards while ensuring compatibility with real-world product requirements.

**Composition:** 100% Polyester

**Keywords:** Water-repellent, Anti-wicking, AATCC 22 Level 4

#### Skin-Friendly Wool Blend with Antibacterial & Heating Functions: Where Warmth Meets Hygiene

Tailored for next-to-skin layers, this series is ideal for premium underwear, babywear, and base layers. Tested to meet KAKEN's 5-hour pilling standards (>Grade 3), it retains its softness over time. The yarn maintains 7A-grade antibacterial properties even after 150 washes and delivers 25% improved far-infrared heat retention.

Soft-Cloud Cotton Series

Fine Wool Worsted Series

Brushed Fancy Twist Yarn Series

**Composition:** Biodegradable polyester / Recycled acrylic / Acrylic (in varied blends)

**Keywords:** Biodegradability, sustainability, circular economy

#### Biodegradable Polyester Series: Rethinking Polyester in an Eco-Conscious Context

Designed to address the long-debated challenge of polyester degradation, this series uses eco-conscious blends that decompose naturally after use. Ideal for sportswear and casualwear, it offers a responsible alternative for brands seeking to integrate sustainability into their textile sourcing.

#### Fluorine-Free Water-Repellent and Anti-Wicking Series:

**A yarn that "resists water"**

Engineered for high moisture resistance, this yarn offers outstanding water repellency and dynamic anti-wicking performance—remaining impermeable even after 20,000 rounds of bending tests. Designed for footwear uppers and functional outer fabrics, it creates a dry, protective barrier suited for both urban and outdoor environments.

**Composition:** 6% Wool / 40% Anti-pilling Nylon / 30% Anti-pilling Acrylic / 24% Polyester

**Keywords:** Antibacterial, anti-pilling, far-infrared heating, baby-friendly

#### Classic Yarn Collections

Hengtai's classic yarns are defined by their material consistency, comfort, and fabric performance, offering reliable solutions for mid-to-high-end knitting and weaving. From cotton-cashmere blends with a cloud-soft hand feel, to high-count wool worsteds with clear structure, and textured fancy yarns with visual dimension—these products form the material foundation for versatile fashion expression.

Designed for balance between tactility and fabric appearance, the collections are suited for next-to-skin knitwear, tailored garments, and refined everyday apparel, supporting both timeless essentials and seasonal concepts.

#### Soft-Cloud Cotton Series

#### Fine Wool Worsted Series

#### Brushed Fancy Twist Yarn Series

Hengtai remains committed to addressing the evolving needs of the market—across sustainability, practicality, and style. With a focus on ongoing material development and structural innovation, the company continues to expand the real-world value of yarns through well-integrated, application-ready solutions.
