

HONG KONG - LOS ANGELES - NEW YORK - PARIS - SHANGHAI

# SAVE THE DATES

**AUTUMN WINTER 2026-27 COLLECTIONS**

YARNS – FIBRES – KNITWEAR – KNITTED PRODUCTS

SPINEXPO™ has become the most important event in the high-end textile spinning and in the flat bed and circular knitting sector over the years.

It was launched 30 years ago in Shanghai – China and takes place twice a year.

**SPINCLUB NEW YORK AND LOS ANGELES** are B to B version

of SPINEXPO™ Shanghai and presents the AW 25-26 collections

of Shanghai Major Exhibiting companies.

SPINCLUBS New York and Los Angeles and exclusively welcoming potential clients.

## SPINCLUB NEW YORK

**8-9 JULY 2025**

"THE GALLERY & THE SUITE" METROPOLITAN PAVILION

123 WEST 18<sup>TH</sup> STREET - NEW YORK - NY 10011

## SPINCLUB LOS ANGELES

**15-16 JULY 2025**

COOPER DESIGN CENTRE

860 SOUTH LOS ANGELES STREET, SUITE 1100 - LOS ANGELES CA 90014

Pre-registration & list of exhibitors : [www.spinexpo.com](http://www.spinexpo.com)

### NEW THIS SEASON

**A larger trend area including presentations from Shi-Kwan NAIA products, and a joint yarn line from the cooperation of Yarns & Colors and M.Oro under the brand "Cashmoria".**

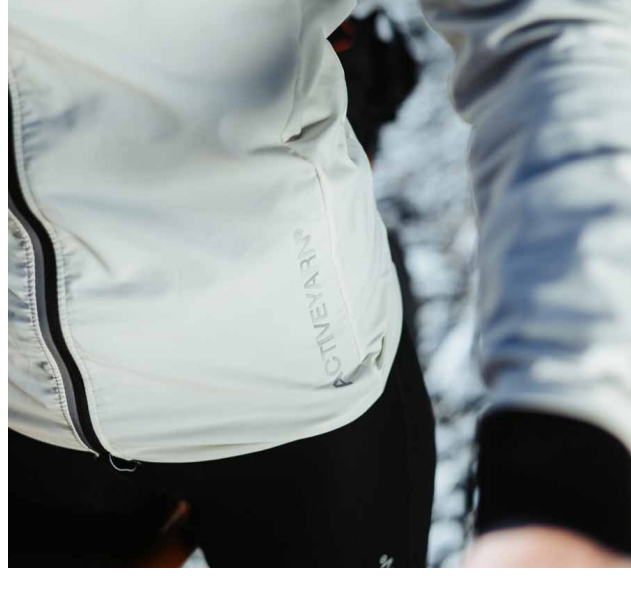

**A new applications of Wool in the Woven Fabric Sector**

**by SÜDWOLLE GROUP**

**Südwebs Innovation Hub** is the innovation center of Südwolle Group. It works alongside the supply chain to offer R&D, design, trend insights, and holistic solutions to the industry, with a mission to explore and expand the potential of wool. The latest applications of wool in the woven fabric sector are a successful development born from the Innovation Hub.

Globally, the dominant trend is toward sports and comfort, with fewer occasions and people wearing formal attire. Traditional worsted wool fabrics were developed for formal and business-casual wear, and their style and performance do not align with the needs of activewear. The sportswear sector demands fabrics that are stronger, with more functionality, and even more technical in appearance.

Now, through continuous R&D and improvements in spinning technology, Südwolle Group has successfully combined wool fibers with functional materials to overcome the application limits of wool. Wool woven fabrics are now used in categories like second-skin layers, hiking pants, windbreakers, and down jackets—greatly expanding wool's reach into high-performance apparel.

#### Down Jackets

This is another innovative application of woven wool by Südwolle Group. Wool-blend yarns are cross-woven with nylon filaments using diverse fabric constructions to create textures with a sporty aesthetic. Rarely seen in wool fabrics, 3D pigment printing adds artistic flair. The jackets are filled with 100% recycled wool, giving natural fibers renewed value while providing warmth, breathability, and abrasion resistance. This unifies function and style, and reflects a future-forward vision where fashion, nature, and performance coexist in harmony.

#### Greenport

Nm 60/2 - 100% Wool (17.5mic TEC)

#### Sintara Betaspun®

Nm 100/1 - 75% Merino Wool (16.2mic, TEC))

17% Nylon Filament - 8% Lycra

#### Windbreakers and Second skin

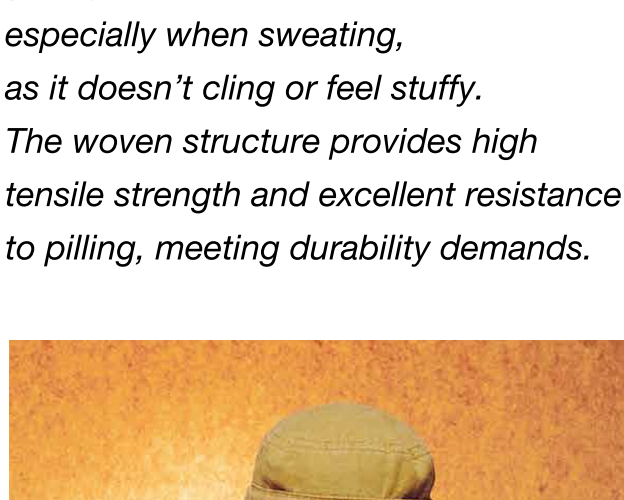

##### Cycling Wear

Südwolle Group innovatively combines nylon filament with wool through a woven cross-weaving technique. The resulting fabric is dense enough to be windproof, yet extremely lightweight at just 130gsm.

It also has 2-way stretch, ensuring freedom of movement. Compared to traditional 100% polyester or nylon sports fabrics, the addition of wool greatly enhances skin comfort—especially when sweating,

as it doesn't cling or feel stuffy.

The woven structure provides high tensile strength and excellent resistance to pilling, meeting durability demands.

#### Hermosillo Betaspun®

Nm 100/1 - 79% Merino Wool (16.2mic, TEC))

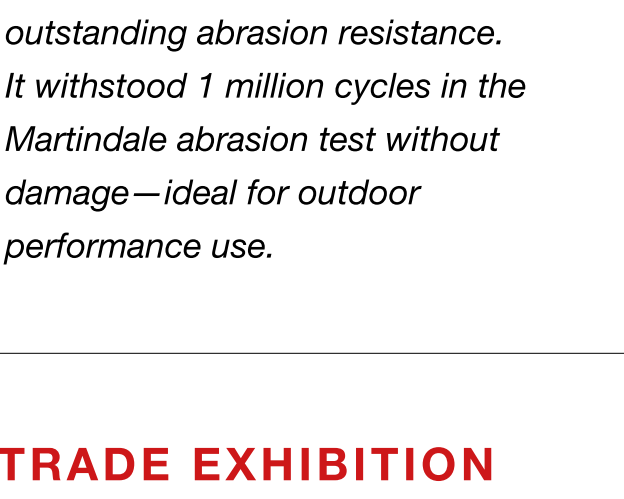

21% Nylon Filament

#### Hiking Pants

These use coarse-denier nylon filament in the warp and 100% wool in the weft, forming loops on the reverse side of the fabric. The result is a mid-weight fabric with excellent warmth,

great next-to-skin comfort, and outstanding abrasion resistance.

It withstood 1 million cycles in the Martindale abrasion test without damage—ideal for outdoor performance use.

**DON'T FORGET THE TRADE EXHIBITION**

## SPINEXPO™ SHANGHAI

**19-20-21 AUGUST 2025**

WORLD EXPO EXHIBITION & CONVENTION CENTER

1099 GUOZHAN RD, PUDONG - SHANGHAI - CHINA

**An extensive offer from the spinning and knitwear industry**

**180 exhibitors**

**Multiple trend zones**

**PREREGISTRATION IS MANDATORY**

**CHECK OUR WEBSITE: [WWW.SPINEXPO.COM](http://WWW.SPINEXPO.COM)**
