YARNS – FIBRES – KNITWEAR – KNITTED PRODUCTS

SPINEXPO™ SHANGHAI

19-20-21 AUGUST 2025

WORLD EXPO EXHIBITION & CONVENTION CENTER

1099 GUOZHAN RD, PUDONG - SHANGHAI - CHINA

Opening hours: Day 1 & 2: 9.00 - 6.00 pm / Day 3: 9.00 - 4.00 pm

SPINEXPO™ is an international event for top-class spinners and integrated high-fashion knitwear manufacturers. Most of these companies have their collections and research and development departments that can work directly with international brands. 200 textile spinning and knitwear exhibitors present their Autumn/Winter 2026-27 collections.

Preregistration is strictly mandatory: www.spinexpo.com

No registration onsite.

Visitors who preregister on site will be accepted the following day.

PROFILE OF EXHIBITORS

YIWAGOE:

Advancing Differentiated Fibers on a Foundation of Wool Expertise

In the dynamic world of knitwear, yarn remains the unseen force behind innovation—bridging material function and aesthetic possibility.

With over 20 years of expertise, YIWAGOE has built its reputation on worsted, woolen, and fancy yarns, delivering fine-count wool and richly textured blends to high-end knitwear brands. Precision, consistency, and quality are the cornerstones of their manufacturing philosophy.

More recently, YIWAGOE has embraced material innovation, collaborating with global partners like Eastman and Asahi Kasei to develop wool-like acetate and cuprammonium fibers.

These fibers mimic the softness and warmth of wool while offering enhanced drape, breathability, and skin comfort.

Designed for modern urban wear, they blend seamlessly with wool, cashmere, linen, or silk—expanding their applications across fine worsted, linen-like, and silk-like textiles.

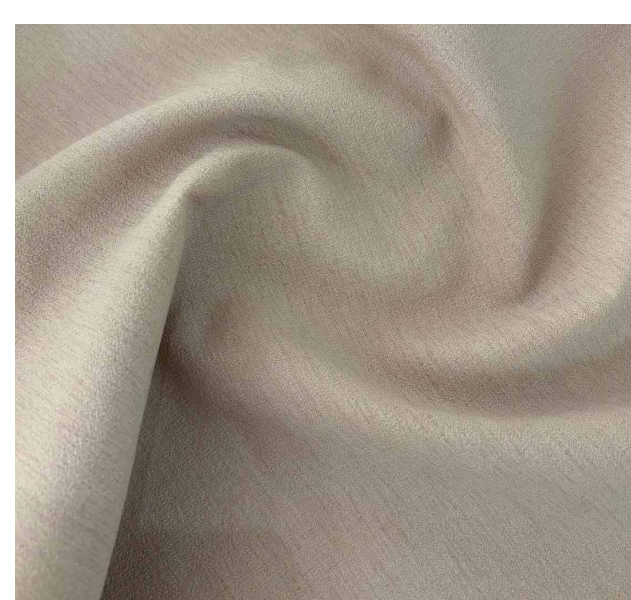

Beyond flat knitting, YIWAGOE also offers solutions for circular knits and woven fabrics.

Their portfolio includes:

- Polyester Slub Fiber**, a processed fancy yarn that brings natural slub texture to casual or conceptual fashion.
- PIN False-Twist Fiber**, soft, airy, and elastic, ideal for comfort-driven activewear.
- Ultra-Light Wool**, redefining traditional wool with a lighter, more breathable structure.
- Recycled Wool**, aligning with sustainability goals without compromising performance.
- Washi Yarn**, a fine-count blend of Japanese paper fiber and recycled polyester, delivering breathability, structure, and cultural nuance.

These forward-thinking materials offer expanded creative potential for designers and a more refined experience for end users.

Looking ahead, YIWAGOE will continue to pursue fibers that combine sustainability, technology, and textile innovation, supporting a smarter, more responsible future for the knitwear industry.
