NEW FIBRES - RECYCLED FIBRES

LUGANG

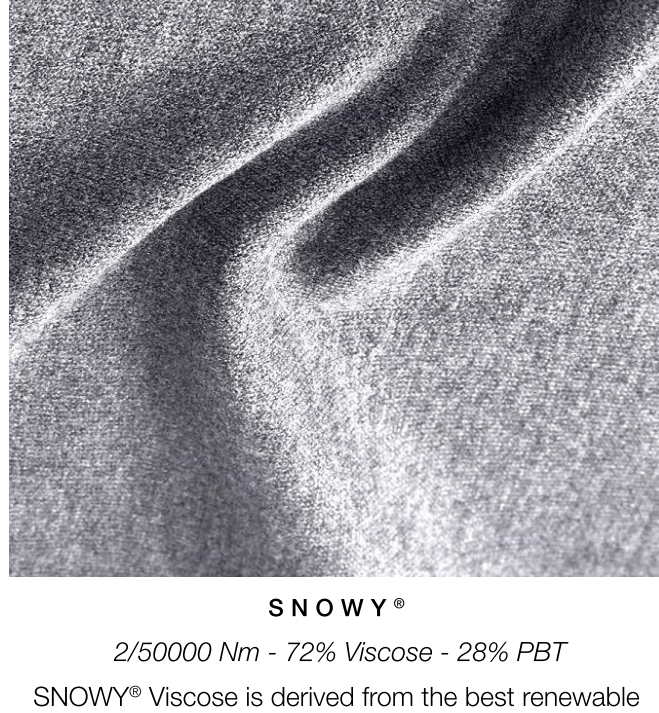

DONDA

3/68 Nm - 30% RWS Wool - 70% Naia™ Acetate

DONDA will bring you extreme skin-friendly feeling, by perfect combination of sustainable & degradable Acetate Naia™ fiber and wool. Not only it keeps you warm, but it also brings better wearing experience. Additional value to luxury wool blend sweater is created.

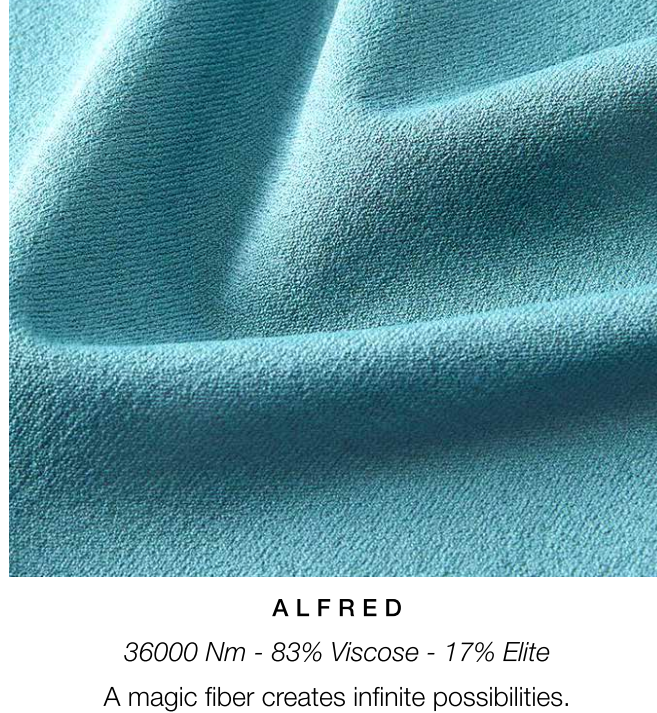

YARNS & COLORS

SNOWY®

2/50000 Nm - 72% Viscose - 28% PBT

SNOWY® Viscose is derived from the best renewable source in Europe and Austria. It is FSC certified and effectively reduces pollution, completed with the CNTAC-LCA product carbon footprint certification. By blending elastic fiber into the soft and skin-friendly texture, it breaks through any restriction from the cloth's elasticity and material.

ALFRED

36000 Nm - 83% Viscose - 17% Elite

A magic fiber creates infinite possibilities. Breathable and moisture-wicking, allowing the skin to breath freely, efficient, highly elastic and not tight, excellent anti-pilling performance, dynamic and fashionable.

WINNING TEXTILE

ACETATE

1/37 Nm - 77% Naia™ Acetate - 23% Stretch Nylon

Biodegradable, lightweight, easy care, quick-drying and cool to touch, UV Care, Anti-Bacterial, Pilling Resistance.

SHILEAD

WEW-XLD001C

1/13 Nm - 100% Recycle Polyester

Shilead 23-24 blockbuster star product Cashlead EAD cashmere, once launched, has been well-received by domestic and foreign customers. Using 100% sustainable materials in line with the current low-carbon environment trend, soft and skin-friendly, the anti-pilling up to level 3 has increased the practicality of the product. Raw yarn and sample cone in 24 colors from color cards are available, offering convenience for all customers.

WES-XLD380

1/7.8 Nm + 2/36 Nm - 66% BCI Cotton - 34% Nylon+ 60% Recycle Polyester - 35% Acrylic - 5% RWS Wool

Using high proportion of cotton ensures the characteristics of skin friendliness and softness. Rich color effects highlight fashion and personality of the knitwear. With the bulk products made all year round, the whole cloth is getting lighter and lighter, breaking the dull and heavy feeling of traditional yarn blending.

WEW-XLD003

2/50 Nm - 62% ECOVERO™ - 28% PBT - 10% Silk

Stretch yarn made with LENZING™ traceable eco-friendly viscose and skin-care silk. The slightly higher twist ensures that the yarn has a certain stiffness, which brings the texture of the fabric characteristic, but also has a subtle sense of luster, very suitable for high-end and delicate womenswear.

WEW-XLD015

1/1.7 Nm - 81% Recycle Polyester - 19% Polyester

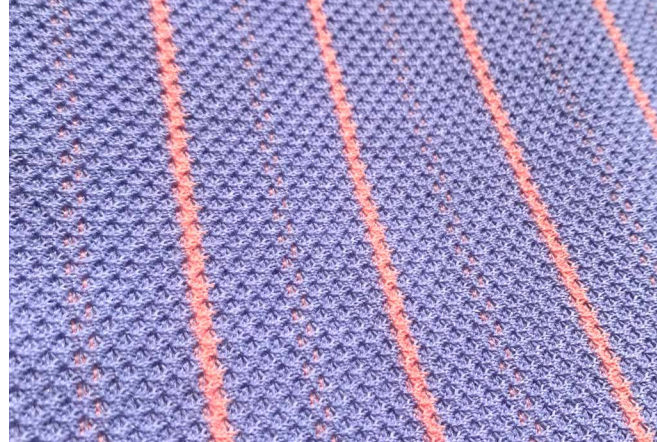

A coarse count fancy yarn product of Cashlead series. The unique raw material ensures the soft but not loose inherent style. Through the low-carbon environmental protection dyeing of Shilead, different attributes of raw materials show the difference in shrinkage, obtaining the well-proportioned style, and improving the comfort of wearing.

WEW-XLD028

2/68 Nm + 2/48 Nm - 77% ECOVERO™ - 23% PBT+ 52% ECOVERO™ - 28% PBT - 20% Nylon

Elastic product made with a proportion of LENZING™ environmental protection viscose, supplemented by the most popular stock-service products of Shilead. This extremely cost-effective product becomes a classic. 215 colors in stock can well meet the development and sampling needs of all kinds of brands.

WEW-XLD029

1/18 Nm - 100% Recycle Polyester (Anti UV)

A supplementary product of Cashlead series. Based on all the features of the original product, the yarn being designed for 12 gauge increases the delicacy of the product and the range of application, like light sports and casual wear.

At the same time, the addition of anti UV functionality plays a certain protective effect on the skin.

LANIFICIO DELL'OLIVO

FLOWER

49000 Nm - GG 14-16 - 66% Recycled Polyester - 34% Polyester

Very thin recycled silk polyester with a soft and compact hand feel. 56 available colors, 8 colors for sampling, 10 stock service colors.

HUBO

HNW 23037

1/13 Nm - 34% CELYS™ Polyester - 31% Nylon - 26% Modal - 6% Merino Wool - 3% Spandex

Biodegradable CELYS™ Polyester mixes the best of both yarn properties with a sustainable concept, the yarn is fuzzy and delicate, super soft and warm.

ZHEJIANG XINAO

EDEN

2/48 Nm - 60% Extrafine Merino Wool - 40% Naia™ Acetate fiber

Worsted spun yarn of Eden is developed with the concept of natural sustainability and it is made from an intimate blend of extrafine merino wool and acetate fibre Naia™. Naia is cool and breathable, moisture-absorbing with fast drying properties. The soft and fluffy hand feel of wool gives the product excellent performances.
