FOCUS ON EXHIBITORS' BEST SELLERS.

NOUVELLE FINE ECO is an organic cotton and cashmere blend yarn with all the fiber's freshness and softness. It is the crystallization of UPW's nearly 40 years of spinning experience in this industry and **our signature yarn**. The cashmere comes from Inner Mongolia, China's four major production areas. UPW has a strong chain of custody from cashmere to yarn production to ensure quality and traceability. Organic cotton is a kind of purely natural and pollution-free cotton. UPW has joined the Textile Exchange 2025 Sustainable Cotton Challenge by cultivating and acquiring regenerative methods, promising that all cotton used is 100% from sustainable procurement. Nouvelle Fine ECO is certified by GOTS.

XINFANG

For the spring/summer 2024 collections, XINFANG prepared 85 sets of new yarn qualities, using various durable materials and organic fibers to introduce different types of yarn styles, and all of them were well received by our customers.

Below are five popular yarns presented at SPINEXPO Hong Kong and Paris B2B.

EVERLEY XFSS0915

2/8 Nm, 50% Re-Polyester, 40% EcoVero, 10% Linen

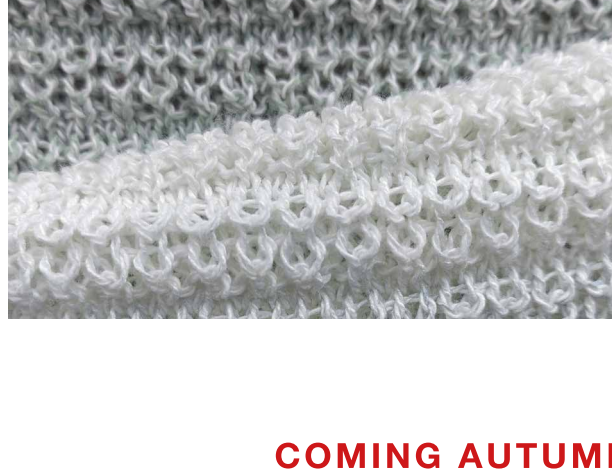

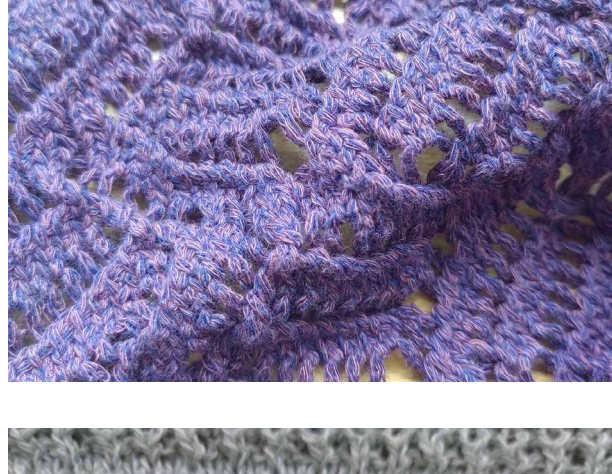

This yarn uses recycled polyester and Lenzing's EcoVero, adjusting it with a bit of linen to ensure its hygroscopicity and gas permeability characteristics. It has the elements of a soft touch, using the new short fiber color change technology.

It has a price advantage, as it can partially replace the expensive effect of long space dyeing.

NOEL XFSS0904

1/14.5 Nm, 53% Cotton, 31% Acrylic, 16% Polyester

It is a fine gauge TT yarn, suitable for 12gg. It can achieve an obvious color change effect, using the technology of short and long fibers, with partial dyeing procedures, finally achieving a relatively lighter, breathable and comfortable fabric.

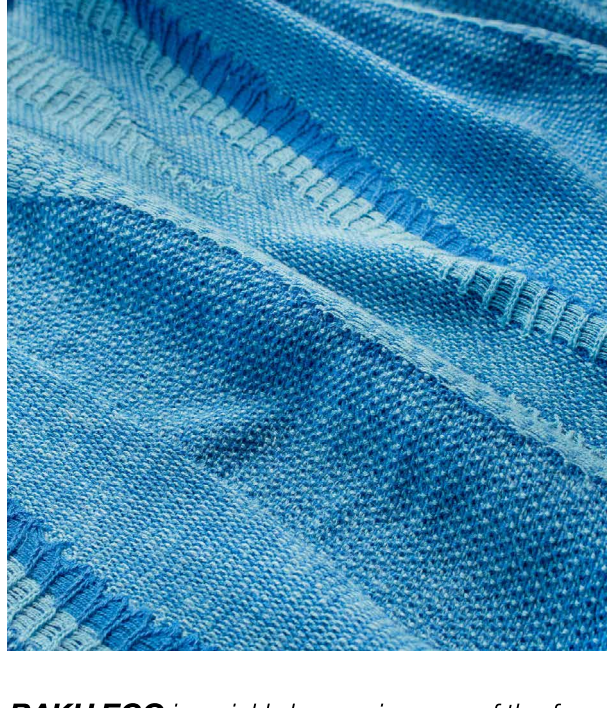

UPW

UPW was established in 1984, producing designed luxury and sustainable yarn collections.

UPW offer over 200 yarns and 3000 colors for genuine stock support service with an order minimum of 1kg per color.

UPW is an extremely socially responsible company, with a true commitment to environmental protection and sustainability, throughout the production process. UPW was the first one in the industry to launch the ECO series. In 1999, UPW was certified by the OEKO-TEX Standard 100.

RAKU ECO is quickly becoming one of the favorite yarns in the Focus collection. Made from a humble mix of natural fibers, RAKU ECO combines all the softness of the SUPIMA® cotton and the freshness of organic hemp, creating a beautifully simple yarn that is ideal for any item.

RAKU ECO has completed the carbon footprint verification and was awarded the carbon footprint label and certificate from TÜV SÜD.

SOFFIO+ has a delicate hand feel and a softly blurred surface. Spun from organic hemp and COOLMAX® EcoMade polyester, this yarn is suitable for stylish knitwear items, moves moisture away from the skin, and keeps you fresh and comfortable throughout the hottest days of summer. Organic hemp is one of the most sustainable fibers and gets the Best Possible Rating A.

MORGANA+'s unique appearance is created by a soulful combination of color and fibers.

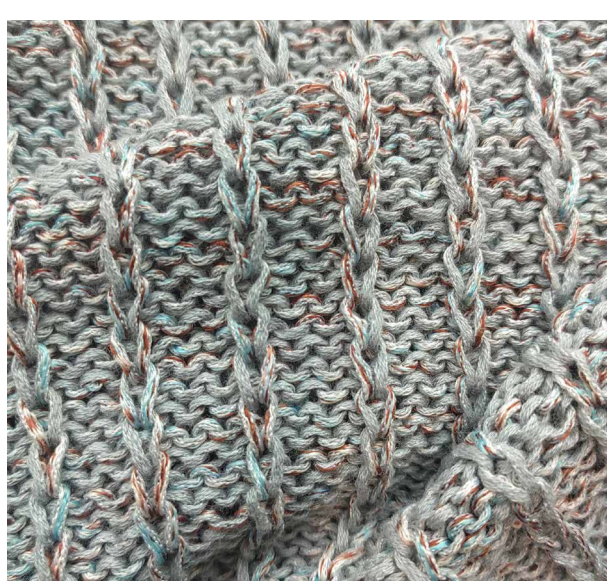

The freshness of organic cotton is softened with a sprinkle of RWS superfine merino wool for a yarn that feels compact, textured, and incredibly summery. The recycled nylon is certified by OBP

Ocean Bound Plastic Certification, it is from fishing nets to fashion, which can reduce pollution and harm to marine life and human food chains.

DAWN ECO's unique airy texture is ideal for those special summer knits that will keep you feeling fresh, cozy, and extremely stylish.

Recycled nylon comes from 100% Post-consumer materials, mainly derived from ghost fishing nets, generated by deep-sea fishery activities, and effective protection of marine animals.

CiCLO® technology can reduce the impact of fugitive plastic microfiber pollution caused by synthetic textiles

GRACE XFSS0899

1/3.2 Nm, 100% BCI Cotton

This yarn is made from all-natural BCI cotton. It creates a layered print and 3D effect using the ingenious method of color adjustment according to its own unique technology.

LAMBERT XFSS0872

1/2.8 Nm, 62% BCI Cotton,

38% Recycled Polyester

This yarn is made of natural BCI cotton and recycled polyester. It has a crispy hand feel, lively color and suitable for the Spring wearing.

ELLA XFSS0949

1/4 Nm, 72% Cotton, 28% Recycled Nylon

It is a slub wrapped yarn. By adopting a special enhancement process, it has achieved a soft, smooth and cubic result.
