## YIWAGOE

An exceptional spinning mill, a resolutely top-of-the-range collection at affordable prices!

### YIWAGOE INTRODUCES FOUR MAIN COLLECTIONS:

#### NATURAL ANIMAL FIBER

By reconnecting with nature, natural animal fibres, luxurious and simple, combined with meticulous blending and craftsmanship, add the softest touch.

#### QUILL

70% kid mohair, 30% silk

We combined mohair with local silk, which not only improved its lustre and feel, but also gave it an internal resilience, preventing the mohair from flapping.

#### MELLOW

40% wool, 30% llama, 26% nylon, 4% SP  
Selected llama and wool give MELLOW a silky feel. Similar to cashmere, it has a unique hollow structure for superior warmth, breathability and durability. Enhanced with just the right amount of stretch nylon and spandex, the fabric is as light as a feather, with a soft, supple and smooth feel that is both warm and luxurious.

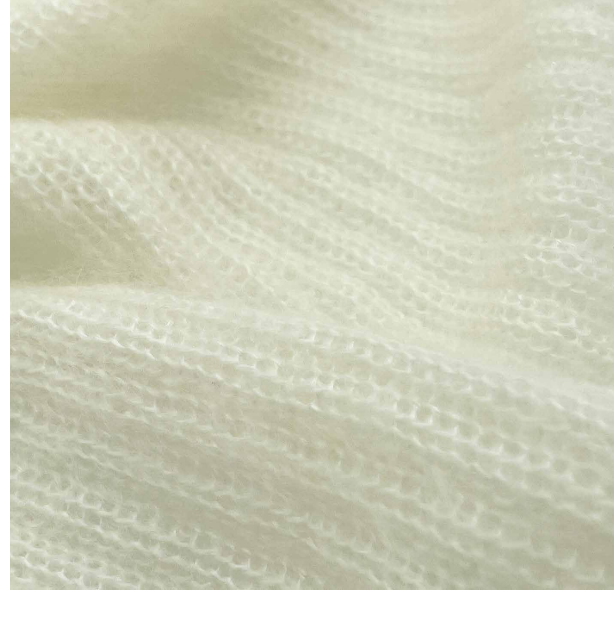

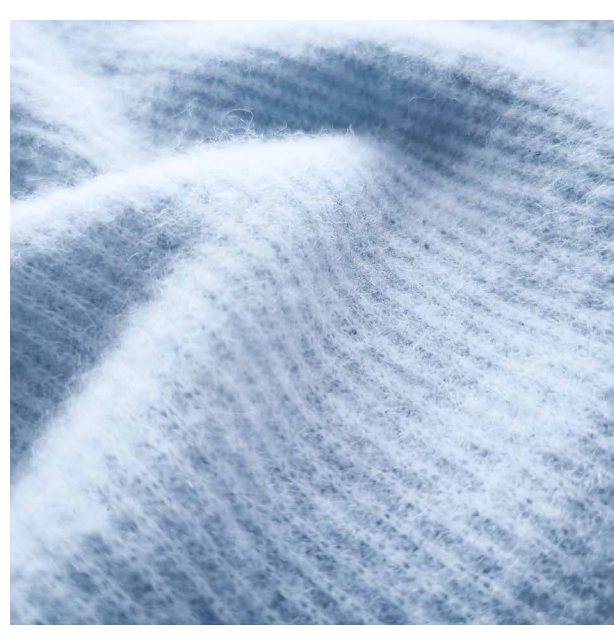

In 2023, YIWAGOE celebrated its 20<sup>th</sup> anniversary.

It was 20 years ago that the journey began on the Japanese market with SILKCAMEL.

In 2023, YIWAGOE returned to its original characteristics, those that made its reputation: the integration of international fashion trends and unique Japanese techniques to create high-end yarns from animal fibres.

YIWAGOE keeps in step with the times by using environmentally-friendly materials that focus on sustainability, responding to the desire for lightness and a healthy lifestyle.

#### SUSTAINABLE LIGHT WOOL

In our popular ultra-light wool series, RWS wool is used with sustainability in mind.

#### LOCO

2/20 Nm, 100% wool

2/28 Nm, 100% wool

LOCO is based on the successful experience of GOSPEL and is made from a higher quality material thanks to an improved spinning process, better in terms of anti-pilling, colour effect and colour fastness. The 2/20 and 2/28 are available in different thicknesses.

#### GINKGO

3/78 Nm, 100% wool

GINKGO is one of YIWAGOE's classic yarns, light and gentle on the skin. It is combined with super-fine wool and special techniques. The three-ply construction creates a three-dimensional, fluffy texture.

What's more, lightweight GINKGO outperforms ordinary wool, for stress-free wearing.

In addition to plain colours, YIWAGOE offers blending options.

An offer of artistic yarns with special finishes. 75 colours available in the colour book.

#### FUNCTIONAL YARN powered by JAPAN TECH

Unique fibre technologies from Japan bring various functional effects to yarns, such as moisture wicking and heat retention.

#### VEIL

1/25 Nm, 54% wool, 46% polyester

100% pure Japanese imported yarn.

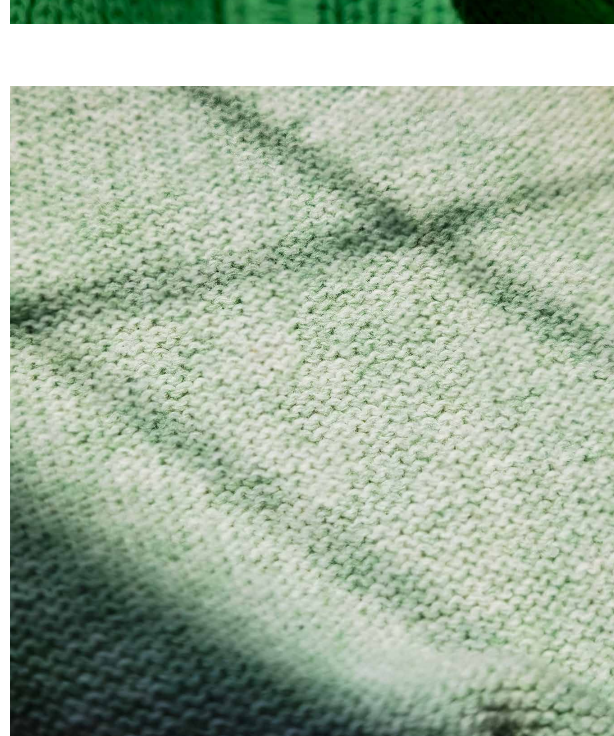

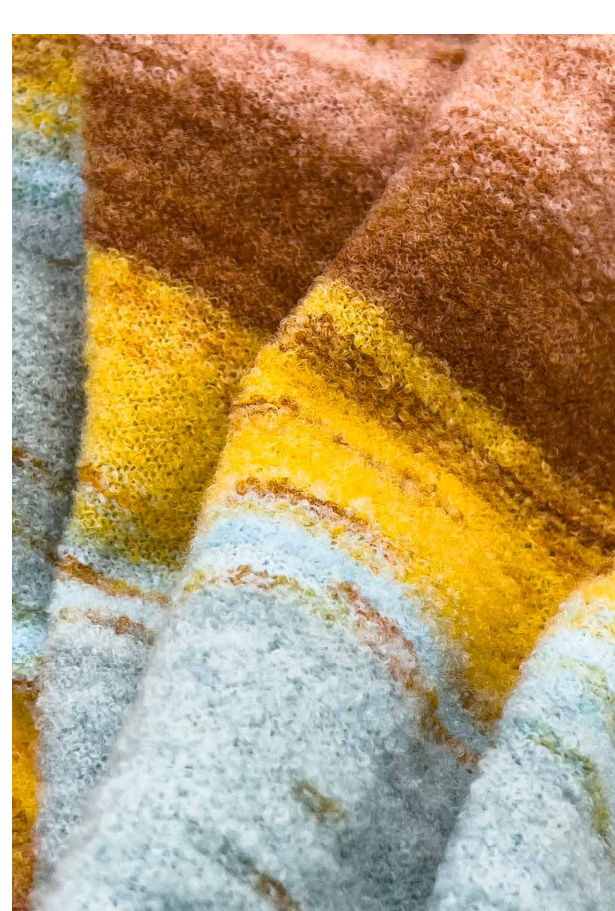

Made from ultra-light, dry wool using special Japanese spinning techniques, the result is a tight, dry fabric that is lighter than other wool-polyester blends.

This yarn has excellent properties, including moisture wicking, quick drying, UV protection, breathability, comfort, elasticity and some firmness. With fine blended yarns, it offers versatile shapes and a wide range of applications.

#### AMARU (Y6016)

2/20 Nm, 60% basulan wool, 40% polyester

Fine, soft high-quality wool, combined with innovative hollow polyester and special treatment, provides warmth without being heavy or stuffy, resulting in a lighter, more comfortable, and voluminous wearing experience.

#### HIGH TECH FANCY YARN

Overseas fancy yarn technology, combined with gradient dyeing techniques, creates exquisite and unique superfine loop yarns.

#### MONICA

1/30 Nm, 40% extrafine merino wool,

40% acrylic, 20% nylon

MONICA is an extra-fine bouclé yarn made from imported ultra-fine merino wool, crafted from a meticulous blend of different fibres.

Delicate particle-like plushness, soft and pleasant to the skin, warm and comfortable, lightweight and lofty, with excellent elasticity.

25 colors, including 5 shades, are available in color book.

1/25Nm, 1/5Nm, 1/7.5Nm, 1/28Nm versions are also available.
