## "SOHO HOUSE" A NEW VENUE

**S**PINCLUB Hong Kong took place in a new Venue offering a larger space, featuring two floors, spacious aisles, an extensive trend area and a cafeteria. Despite this additional comfort, many visitors preferred the previous Lai Chi Kok area, and we will be analysing the plus and minus of this Venue to decide how to continue in the future.

The two-day meeting attracted 366 potential buyers coming from 110 companies, including key buyers and merchandisers from export-oriented trading firms. The first day was particularly dynamic and many attendees shared insights concerning their latest strategies, emphasizing a shift towards innovative, functional luxury and active comfort in fine gauge materials, a rather different search compared to European brands. It appears that production of most basic synthetic items is migrating away from China to countries such as Vietnam, Cambodia, Bangladesh and Indonesia.

Another difference with SPINCLUB Paris was the concern regarding trade tariffs – only perceptible in Paris by price concerns, whereas Hong Kong saw brand buyers urging knitwear manufacturers to swiftly adjust their orders starting in April. The long-term implications of the tariff deadline remain uncertain, and the excess production capacity is impacting the Chinese volume textile market and domestic sales exhibit a weak performance, with retail sales declining by 0,2% in the first nine months of the year.

The industry is transitioning from a focus on scale expansion to value creation. Challenges such as narrowing profit margins and delayed payment time reaching up to 70 days have an impact on manufacturing rentability.

The coming model continues to shift from scale expansion to value creation, flexible supply chains, digital enhancements and green transformation. However, it seems that knitwear is doing better than woven clothing.

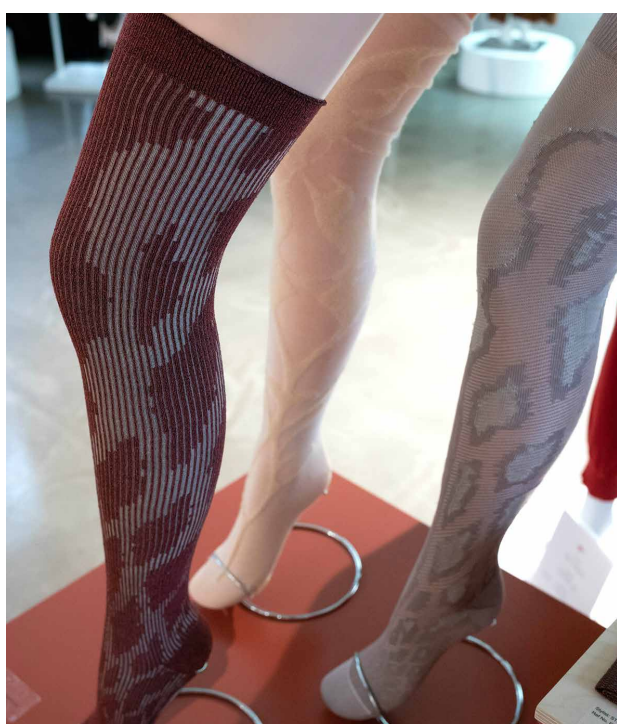

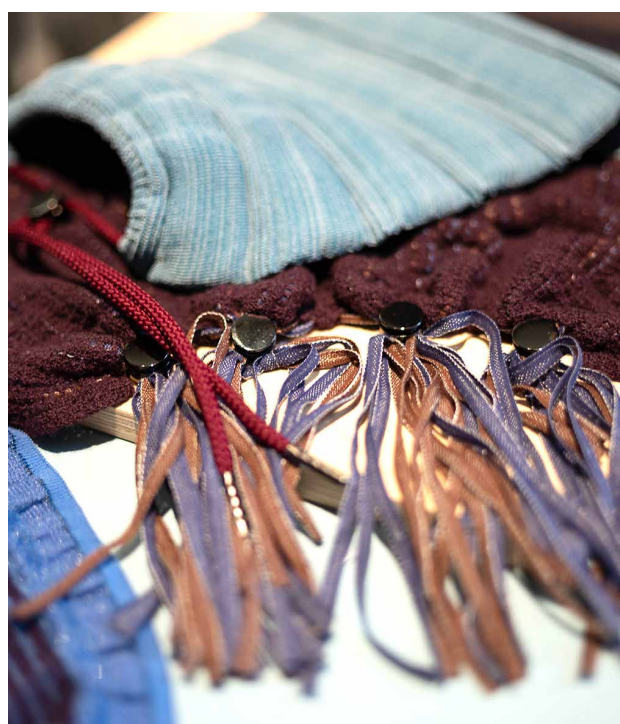

**Due to the late China Lunar Festival, we will not be hosting a S/S session in 2026 and will profit from this new timing to study how to go forward.**
